★ UNITY ★ FAITH ★ DISCIPLINE

If Pakistan is to play its proper role in the world to which its size, manpower and resources entitle it; it must develop industrial potential side by side with its agriculture and give its economy an industrial bias. By industrializing our State, we shall decrease our dependence on the outside world for necessities of life; we will give more employment to our people and will also increase the resources of the State.

On the occasion of laying the Foundation-Stone of the building of the Valika Textile Mills Ltd. on 26th September, 1947
www.quaid.gov.pk/speech08.htm

Mian Manzoor Ahmad Wattoo Federal Minister for Industries & Production

Technology has increased the productivity of natural resources. Not all the countries have been able to reap the benefits of globalization and trade liberalization due mainly to lack of competitiveness of their export products in the world markets. The SME sector need networking programmes that could help to enhance their trade promotion capacity and the quality of their export products so that they may be able to participate significantly in world trade as a consequence gain access to global markets.

Allah All-Mighty has blessed Pakistan not only with large deposits of natural stone, but also with some of the best quality marble, onyx and granite. The sector has failed to exploit the real potential. Years of neglect, outdated mining methods and lack of modern manufacturing facilities have taken their toll. Despite being accorded the status of industry over a decade ago, it has underperformed. Poor infrastructure, lack of supply chain management, inefficient technology, Lack of standards and conformity are major challenges faced by the sector. While trade liberalization offers great opportunities to manufacturers, these opportunities can only be exploited successfully if they are capable of dealing with global competition, a great diversity of markets and rapid changes in technologies and consumer preferences. The government of Pakistan is committed to far reaching industrial reforms to develop marble and granite sector. PASDEC has been established by the Government of Pakistan to address the overall issues of the sector and reposition Pakistan Stone Sector on a sound competitive footing by means of establishing business models of International best practices demonstration effect & Human Resource Development.

The Government through a network of industrial parks called "Marble Cities" and model quarries will uplift the stone sector and link up local industries with the international markets. The Government plans to support the industry through various incentives to attract investments & technology promotion. The development projects will have tremendous affect upon the economy. It will create job opportunities and alleviate poverty in rural areas, especially women in value added products like marble mosaic making. Under Enterprise House Hold Models, PASDEC is promoting self employment opportunities to uplift rural women and developing stone entrepreneurship culture sustainable basis.

The **2nd Stonefair Asia 2009 Int'l Exhibition & Conference** is great Event to bring close the international experience and best business practices. I welcome the international participants on the occasion and look forward for their proactive role in developing this vibrant sector and take opportunity of the construction industry boom in Pakistan.

Syed Mustafa Kamal
City Nazim, Karachi

I am pleased to see 5th Build Asia 2009 Exhibition & 4th International Conference on Construction Industry incorporating 5th Furniture Asia and 2nd Stonefair Asia. I believe that these exhibitions are important to create a positive image and confidence of the international business community.

The Government realizes the significance of Karachi as a hub of business activities in Pakistan and believes that it is of utmost importance that Karachi keeps playing its due role in the progress of nation's economy. The Government also gives emphasis to improve law and order situation in Karachi to attract investors from around the world. With the completion of various mega projects, coordinated progress in social sector, provision of civic amenities, Karachi would soon assume a significant position in the ranks of the world's developed cities in the next couple of years.

I warmly welcome all participants, visitors, foreign and local delegates to 5th Build Asia 2009. I assure full support to the Ministry of Housing and Works, Pakistan Stone Development Company - PASDEC, Ecommerce Gateway and Jamal's Yellow Pages of Pakistan for organizing such a great Event.

Ihsanullah Khan
CEO/Chairman
Pakistan Stone Development Company

Pakistan Stone Development Company (PASDEC) is determined to implement the Marble & Granite Strategy and its ambition to bring into reality the vision of industrialization through exploitation of natural stone reserves in the country. The sector development strategy focuses on the core concept of a public private partnership— a strategic joint venture in which the private sector - bestowed a lead responsibility in managing the affairs with technical expertise.

PASDEC has set up sustainable mechanized limestone (marble) quarry in Khuzdar based upon international best practices that produces value added square blocks and minimized huge wastage from 85% to 47% of valuable resources caused by blasting. This will enable to produce international quality products with high export value. **PASDEC** is also establishing marble cities and machinery pools to promote mechanized quarrying and state of the art processing units. This will develop business environment and build private sector confidence. In addition the Company is facilitating private sector to participate in international stone fairs with **TDAP** (Trade Development Authority, Government of Pakistan) to build business contacts and increase trade flows.

Marble City Project will change the landscape of marble and granite sector. It will nurture a competitive export cluster for value added trade. The Marble City will have facilities like CFTC(Common Facility & Training Center) for processing services ,warehouse facility, effluent treatment plants, a stone testing laboratory to conduct international accredited stone tests & a Dimension Stone Training Institute to develop workforce, technicians and managers. Marble City is a stone marvel industrial estate for processing square block into finished, polished slabs, cut to size and value added products for both local and international markets. Very soon the Prime Minister grace the ground breaking ceremony at Risalpur Marble City.

Stonefair Asia 2009 is the foremost stone industry event consistently incorporating the best of the international stone industry together. **Stonefair Asia** will offer both International and Pakistani business community a strategic venue to access the vibrant central Asian and south Asian markets linked with the middle east & meditation markets

The aims of this mega event is to first and foremost focus on the immense potential of the building and construction boom in Pakistan and display latest technological advancements of equipments and techniques in the related fields, providing immeasurable opportunities to Overseas Exhibitors to interact with domestic entrepreneurs for joint ventures, transfer of technologies and social economic development .

I am grateful to domestic and international partners for providing technical assistance and support. I am indebted to the Ministry of Industry & Production, Government of Pakistan, SWOG members, SMEDA, TDAP, EDB, PISDAC, PIDC, the Private Sector, All Pakistan Marble Industries Association(APMIA), DGMM Sindh, Baluchistan and Peshawar and my special gratitude to HE the Ambassador of the Republic of Italy for providing support and encouraging other partners to join this great endeavor. The firm commitment by the Government of Pakistan to harness the competitiveness and reposition the sector for exports is instrumental. I firmly believe this effort will be rewarded by the Grace of Allah, The Most Beneficent, The Most Merciful.

I am also indebted to the Honorable Prime Minister of Pakistan, Minister of Industries & Production, Minister of Commerce, and The Minister of Finance for their unflinching support and guidance to revolutionize the dimension stone sector in Pakistan. I believe this sector will become a business role model in South Asian and indeed the across the Globe.

Dr. Khursheed Nizam
President
Ecommerce Gateway Pakistan

First of all, I would like to thank Almighty Allah who blessed us with the strength to contribute towards the economic development of Pakistan through the organization of international exhibitions and conferences in Pakistan such as **Build Asia, Furniture Asia and Stonefair Asia**. As the events are international in nature, hundreds of participants attend exhibitions and conferences organized by Ecommerce Gateway, allowing them to have the opportunity to explore the immense business and investment opportunities Pakistan offers. Many ventures, partnerships and joint ventures find their roots through participation in our exhibitions. Our events also improve Pakistan's image globally as a modern and progressive country.

Since organization of mega international IT Event of Pakistan, ITCN Asia 2001, Ecommerce Gateway has organized a number of successful events covering important sectors of economy such as Engineering, Automobile, Textiles, Health, Construction, Agriculture along with many others. As Ecommerce Gateway organizes more than 20 International Exhibitions every year, it is now widely regarded as 'Pakistan's Number # 1 Event Organizer'. Presence in all the major cities of Pakistan, international marketing office in Singapore, a strong network of international agents, the use of modern management techniques and continuous support and encouragement from the present Government are some of the factors that have enabled Ecommerce Gateway to achieve distinction in performance as is reflected through its phenomenal growth.

I deeply appreciate the support of the Ministry of Housing and Works; Ministry of Defence; Ministry of Industries, Sindh; Pakistan Stone Development Company (PASDEC), Karachi Building Control Authority; Government of Sindh; City District Government Karachi and Gwadar Development Authority for their contribution in organizing **5th Build Asia 2009** and making it a grand success.

I welcome the foreign and local delegates, investors, entrepreneurs, exhibitors and visitors at Build Asia, Furniture Asia and Stonefair Asia 2009 Int'l Exhibitions, Int'l Conference on Construction Industry (ICCI) and Int'l Conference on Marble & Granite I assure you of full cooperation and support from the organizers and am confident that your visit will be fruitful and rewarding.

The background features a stylized illustration of a construction crane and a city skyline. The crane is positioned on the right side, with its jib extending towards the left. The city skyline is located at the bottom of the image, consisting of several buildings of varying heights. The entire scene is rendered in a monochromatic color palette of orange and yellow.

Conference Programs

4th International Conference on *Construction Industry - ICCI*

August 11, 2009, Conference Hall, Karachi Expo Centre, Pakistan

Session Sponsor: Engro Polymer & Chemicals Ltd.

Session Co-Sponsor: Lucky Cement

Chief Guest: Honorable Mr. Zubair Motiwala, Advisor to CM & Chairman, Board of Investment, Sindh

Co-Chair: Mr. Asif Qadir, President, Engro Polymer & Chemicals Ltd. (EPCL)

09:00 - 10:00	Registration
10:00	Arrival of the Chief Guest
10:00 - 10:05	Recitation from the Holy Quran
10:05 - 10:10	Ribbon Cutting Ceremony
10:10 - 10:20	Welcome Address
10:20 - 10:30	Key note Speech on The driving force behind the PVC Industry in Pakistan Mr. Asif Qadir , President, Engro Polymer & Chemicals Ltd.
10:30 - 10:40	Topic not received as yet Mr. Nadeem Azhar , Genral Manager Humam Resources, Lucky Cement
10:40 - 10:50	FRAMEZ uPVC Windows and Doors Ch. Zubairuddin , New Era Industries Ltd.
10:50 - 11:00	CPVC pipes system for hot water application Mr. Mohammad Shoab , Zaka Sons.
11:00 - 11:10	Positioning – The Art of Marketing Mr. Zaki Ahmed Sharif , Engro Polymer & Chemicals Ltd.
11:10 - 11:20	Topic not received as yet Mr. Tariq Ibrahim , Genral Manager, Chawla Chemical & Metal Industries (Pvt.) Ltd.
11:20 - 11:30	Marketing Development Activities by EPCL Mr. Qasim Tariq , Engro Polymer & Chemicals Ltd.
11:30 - 11:40	Address by Honorable Mr. Zubair Motiwala
11:40 - 11:50	Question & Answer Session
11:50 - 11:55	Plaue Distribution
	Networking

*The program is tentative some of the speakers yet to be confirmed.

**International Conference on
Marble & Granite**

August 2, 2009, Conference Hall, Karachi Expo Centre, Pakistan

Chief Guest: Honorable Mian Manzoor Ahmad Wattoo

Federal Minister for Industries and Production – Government of Pakistan

10:00 – 10:30	Guests to be Seated
10:30	Arrival of the Chief Guest
10:30 – 10:35	Recitation from Holy Quran
10:35 – 10:40	Welcome address
10:40 – 11:00	Dr. Carlo Zerlia Sales Manager, Marini Quarries Group (Quarrying Equipments) & Vice President Confindustria, Marmo Macchine Association
11:00 – 11:10	Dr. Alessandro Stocco Sales Manager, Co.Fi.Plast (Diamond Wires)
11:10 – 11:20	Dr. Stefano Montefiori Sales Manager, Officine Meccaniche Garrone (Chain Saw)
11:20 – 11:30	Dr. Paolo Giacomini Owner, Giacomini Officine Meccaniche (Hoisting Equipments)
11:30 – 11:40	Dr. Andrea Borzone Sales Manager Gaspari Menotti (Processing Equipment)
11:40 – 11:50	Dr. Carlo Messetti Sales Manager Tenax S.p.A. (Abrasives and Glue) & Vice President Confindustria, - Marmo Macchine Association
11:50 – 12:00	Dr. Andrea Mancini Sales Manager, Marmo Meccanica S.p.A.
12:00 – 12:10	Dr. Francesco Dall'Olio Punto Italiano (Pvt) Ltd
12:10 – 12:25	Question & Answer & Conference Summation
12:25 – 12:35	Address by Honorable Chief Guest
12:35 – 12:40	Plaque Distribution
	NETWORKING & LUNCH

The spirit of innovation thrives throughout the world of 3M. The result is more than 40 different technology platforms that transcend borders, connect and synchronize businesses to foster new and exciting technologies, products and opportunities. Combined with a company culture that promotes initiative, 3M's leadership in streamlined operations and commitment to quality are the reasons why 3M ranks amongst the most innovative and respected companies in the world today.

With more than 100 years' experience and more than 75,000 people to draw upon, 3M remains a company that has never forgotten how it all began – with a culture of perseverance, ingenuity and dedication to innovative thinking. 3M will continue to lead and create relevant and practical products that improve the present for a better future.

Building value for our customers is our central goal. Contributing to their success is the way we do business. Operational excellence fuelled by 3M Lean Six Sigma makes it all possible. 3M Lean Six Sigma helps us deliver with value built in – to every product, transaction and interaction along the way.

3M prides itself on its innovative approach and collaborative culture. That is why our products can be found almost everywhere doing virtually everything. There are well-known products and brands, such as the

Post-it® Note on your fridge door or the Scotch® Designer Tape Dispenser on your desk, and more surprising products like the 3M™ RFID security tag in your public library book or the reflective paint on the street in front of your door. It is these rather random connections that define 3M.

With a culture based on research and development, it is not surprising that 3M employs 6,500 scientific experts worldwide. The company promotes a working environment where people are motivated to be creative and to explore. This requires a degree of tolerance towards different working methods and the occasional misstep. This principle, known as the 3M McKnight Management Principle, gives researchers the opportunity to do their job and the freedom to explore far beyond any expectations – a concept that is vital to continual growth. Throughout 3M, our people are encouraged to stretch their imagination and apply innovative ideas from other business applications, for example health care or office products, and transform them into smart, easy and time-saving products that meet actual market needs.

Not limited to the consumer market, this cross-pollination and fusion of ideas and technologies has resulted in a plethora of innovative solutions used by many of the global industrial players. Ultra-light aerospace void fillers in the latest aircraft, adhesive films for the new Airbus A380, cabinet security systems that keep the world's telecom networks up and running are just a few examples.

Our Consumer and Office division saves time and increases productivity for consumers and office workers around the world. We bring clarity to people's lives with display enhancement films, reflective materials, eye-catching graphics and more, thanks to the expertise of our Display and

Graphics division. Long-term reliable sources of electrical power, high performance electronic devices, and speedy and dependable telecommunications networks bring people together from all over the globe using innovations from the Electro and Communications division. Doctors, nurses and dentists deliver more affordable patient care thanks to the achievements of our Health Care division. Getting goods to the market becomes a lot easier when you have the experience of a global leader in tapes, abrasives, adhesives, specialty chemicals, filtration systems and software for supply chain management. Our Industrial and Transportation division also serves the transportation market with products for the manufacture, repair and maintenance of automobiles, aircraft, boats and other vehicles. For everything precious in this world, our Safety, Security and Protection Services division gives people peace of mind about what matters most: the people, property and processes that we need everyday.

The secret of our success is tied to three things: management standards devoted to getting the best our people have to offer, constant development of an unrivalled breadth of technologies and partnering closely with our customers.

Changing the world does not happen overnight. That is why 3M continuously sets the standards for improvement and innovation, believing that active and responsible global citizenship leads to safer and better living communities.

Environmental highlights

Respect for our environment is a guiding principle of 3M's business policies and practices. An initiative started over 30 years ago, the innovative Pollution Prevention Pays (3P) program continues to be heralded around the globe. Since its

beginning in 1975, this program has prevented more than 1.17 billion kilograms of pollution from entering our atmosphere and saved more than USD 1 billion through avoidance or deferral of pollution control equipment costs.

Energy efficiency, or how to maximize alternative renewable energy is another major concern. Overall energy usage has decreased by 35% since 2000. In 2006 alone, 3M implemented 364 projects and achieved energy savings of more than USD 52.7 million.

Applying innovation from within, 3M systematically challenges the status quo to become a better neighbour in communities around the world.

Social responsibility

Community building is an important component of 3M's sustainability strategy. Through the 3M Foundation and community-based activities, 3M actively supports educational opportunities and health and social services. This includes promoting maths, science and business educational initiatives, sponsoring prevention program such as road safety program in the UK or Infection Prevention trainings in the Gulf, job training and providing humanitarian and disaster relief.

In 2007, 3M contributed to the success of the Special Olympics European Youth Games in Rome by participating in the fundraising campaign called "adopt a champion". The objective of the event was not only a sporting one; sport represents an opportunity for young people to get together, a strong motivation to overcome barriers and prejudices together.

Providing relief with product donations is part of our culture and dear to our heart. 3M South Africa annually contributes with products such as wound dressings, dental

restorative materials and stethoscopes to the Transnet Foundation's Phelopepa Service, the first primary health care train in the world that now operates as a health and educational facilitator reaching thousands of people in remote, underdeveloped rural communities throughout the country.

3M people

3M holds every single employee in high esteem. As a leading company 3M supports initiative and challenges each individual to raise the bar! This is reflected in the company culture of trust and respect, the global exchange of ideas and communication, acknowledgement of achievements and educational opportunities.

In addition to core competence training, 3M supports educational initiatives to help develop the breadth of experience, decisiveness and wisdom of our future leaders. This education is conducted by partnerships with local universities, such as the 3M Key Account Academy in association with the University of Munich and 3M's Marketing Leadership Development Program. These leaders represent the future of 3M. It will be up to them to get the best from our people and reinforce the spirit of innovation and culture of collaboration so we can continue to realize our full potential.

A.T.S. SYNTHETIC

3rd Floor, ATS Heights,
7-Durand Rd.,
Lahore, Pakistan
Tel: 92 42 37352178, 37358834
Email: info@atssynthetic.com
Web: www.atssynthetic.com
Contact Person: Mr. Tariq Nisar
Designation: Director

ATS is a well known company based in Lahore, Pakistan made its humble beginning, when Mian Nisar Elahi (Late)

and pioneer of ATS Group of Industries started this business in 1968, under his dynamic leadership, hard work and dedication in continuous research in order to offer the best products to their customers. Now ATS is the largest and high quality manufacturer of Man Made Leather in Pakistan.

ATS produces a wide range of Man Made Leather i.e. PVC, PU/PVC Coated fabric, PU Coagulated Leather on Woven and Non-Woven backing. PU Coagulated Nubuck on Woven and Non-Woven backing, PVC Transparent Sheets, films Vinyl Flooring, Rigid Plastic and PVC Vinyl Flex. These products are manufactured by most up-to-date technology. Research and development are key elements of ATS activities and to assure the excellence of the finish products, raw material for production are carefully selected by using advance and environmentally sound check.

Our new wet process line is computerized controlled machinery. It produces the most sophisticated PU Coagulated Leather which has properties like genuine leather (Breathable, moisture preservation, soft and comfortable, micro-porous texture).

ATS plays a vital role in the export of soccer balls. Previously in late 70s, soccer balls manufacturers in Pakistan used to rely on imported synthetic leather. Imported synthetic leather was expensive and its availability was difficult. The introduction of our synthetic leather has virtually replaced the imported synthetic leather because of our quality leather is economical and equally good. Renowned branded soccer balls are also made from our Synthetic Leather. This has resulted, a tremendous boost to export of soccer balls from Pakistan. In the year 2000, Leather division was also setup for the production of PU Film Coated Leather. In this

division, very high quality of PU Film Coated leather is produced in different grains and designs. This leather has all the properties of genuine leather added with rugged polyurethane top coat which has good flexibility and high abrasion resistance. It is also water proof and breathable. ATS is ISO 9001:2000 certified organization we are also member of SATRA (U.K) and we have upgraded our laboratory with SATRA (U.K) testing equipment. We also take technical assistant from SATRA (U.K) organization. By virtue of 38 years of hard work and dedication in this line of business, ATS Group of Industries has emerged as a strong leading group in the country as well as in the export market for different applications i.e. footwear, sports gloves, garments, upholstery, automotive application, high-end bags and luggage, interior furnishing, stationery, surgical and textiles packing etc. This is the brief history of ATS Group of Industries, a long time dedication, innovation, technology and better products. This is the commitment at ATS Group of Industries to develop special skills and to continue to improve the quality of their products based on latest technology. Our ultimate goal is to provide our customers with the materials nearest to genuine leather.

ADAM JEE PLASTIC INDUSTRY

Gul Nawaz Road
Behind Bus Stand
Faisalabad, Pakistan
Tel: 92 41 8783696

Adamjee Dura Built (Pvt) Limited has taken the lead in Pakistan for uPVC Electrical Profile. Our company has been supplying electrical wire ducting, uPVC pipe, flexible pipe & fittings, uPVC electrical conduits in Pakistan. We have a winning EDGE in the control over costs, shared know-how, quality, product range

and prompt delivery in the different markets that we serve. These synergies have allowed us to understand customers needs, respond quickly to market trends and offer competitive prices to our customers.

We have over 25 years industry experience in supplying wide range supplied a wide range of essential uPVC building & office products in Pakistan. These products are used by both the public & private sector. Within the private sector, our products are used in residential and commercial developments. Besides producing electrical wire ducting, uPVC pipe, flexible pipe & fittings, uPVC electrical conduits, for cable protection.

Relying on Highly Competent Human Resources and precious experience of the hold organization's, we have been enjoying up great reputation in the market. We have a highly driven team of experienced management executives, engineers, committed customer service officers, skilled technicians and well-trained logistics crew.

Over the years, we have developed our own in-house comprehensive quality program and operational control system - quality management system (QMS) based on ISO 9001 standards. Focused on continuous process improvement, we have invested heavily in the latest tooling technology, on-site testing laboratories and high-precision German-made extrusion lines.

These investments have made it possible for us to meet new and increasing consumer demands and to consistently manufacture high quality products for our customers. Persistent dedication, technical mastery, and commitment to the quality of our products have made us a leader in uPVC electrical profile.

Adamjee Group is one of the largest and the most diversified group of companies in Pakistan . Founded by the illustrious Adamjee Haji Dawood (Sir Adamjee after being Knighted, in 1938), almost a century ago with a jute trading set up, the group since then has remained a dynamic force in the business world and has been involved with a wide variety of business activities.

Adamjee Polymers Company Private Limited is a manufacturer and distributor of PVC Compound (Polyvinyl Chloride) with headquarters in Pakistan. With over 10 years of experience in servicing the PVC markets in Pakistan. APC has commenced production in January 2008 with the Technical Know How & Back up of Thai Plastics & Chemicals Public Company Limited of Thailand along with its staff fully trained by TPC, who are one of the largest PVC compound and Resins producers in South East Asia. APC is targeting production of around 25000 M.Tons per annum by 2010

AGGLO STONE

Plot # E-1, HUB Industrial Trading Estate
Hub Dist
Lasbela
Balochistan, Pakistan

Agglostone is an ornamental material produced both slabs and tiles obtained from the "Recomposition" of precious natural stone material (Marbles, Silica, sand & Quartz). Conglomerated with binders through vibro compression under vacuum followed by curing.

The recomposition process retains and enhances the aesthetical and physical mechanical properties of the base stone materials. At equal mechanical resistance and dimension of the slabs, Agglostone allows lower thickness and thus lower weight as compared to normal stone materials, with the advantage of easier handling and laying.

The slabs obtained offer high physical mechanical characteristic excellent resistance to abrasion, shocks and flexion. Thanks to its low water absorption degree, to the easy cleaning and to the opportunity of being rebuffered and repolish Agglostone slabs simplify all problems related with maintenance.

Our integrated stone manufacturing and processing plant is equipped with the machines imported from Breton s.p.a. Italy. Our factory is located in the most peaceful industrial area of Baluchistan and only 120 kilometer away from the quarries where we have direct operational investments. Therefore, we always get best quality stone. We have well trained staff to square and cut blocks, slice them on accurate Gang-saw and vertical saw and obtain slabs and tiles of any size.

We have polishing and processing machines and Resin filing drying oven, polishing cutting, chamfering and buffing. We provide service and produce products as per International Standard, specifications as per customer requirement. Our flexible business setup, quarrying and manufacturing ability allow us to cater to the International market and thus are in a good selling position to our customers.

During the aforesaid tenure, the company has marched forward and has strengthened its reputation by capturing the client's confidence, being the result of our experience and execution of deeds.

Company maintains its own fleet of Dumpers, Transit Mixers, Concrete Pumps, Shovels, Graders, Excavators, Vibratory Rollers, Earth drills, Truck/Crawler Cranes and Flat/Low Bed Trailers coupled with in-house workshop facilities in Karachi / Islamabad, for the transportation of plant / equipment / machinery/. The company specializes in Package Services which includes the purchase, collection from the seller yard, inland transport, sea transport, custom clearance in Pakistan, local transport from the Port to buyer/contractors job site etc. In this context, the company has also handled the following projects:

- Tekser Insaat Sanayi Ve Ticaret A.S. Turkey, Chashma Right Bank Canal Project, in D.I.Khan.
- Techno Engineering Services (Pvt) Ltd. Islamabad, White Oil Pipe Line Project from Karachi to Multan.

The company has Sole Distributorship for Pakistan of M/s. Putzmeister AG of Germany, manufacturers of Stationary and Mobile Pumps, Placing Booms, Concrete Distributors, plaster machines etc. and M/s. Liebherr Export AG of Germany, the leading worldwide manufacturers of construction machinery, Transit Mixers, Batching Plants and Tower Cranes etc. etc. We welcome your enquiries and would be pleased to respond to your queries as and when needed.

AL-ABBAS CEMENT INDUSTRIES

Pardesi House No.2/1, R. Y.16
Old Queens Road
Karachi, Pakistan
UAN: 92 21 111-111-224
Tel: 92 21 32470220, 32470229
Fax: 92 21 32470565
Email: adnan@aasml.com
Contact Person: Mr. Abdul Aziz Essa
Designation: Chairman & CE

Al-Abbas Cement Industries Ltd. is a member company of the Al-Abbas Group, which is an important player in business sectors of cement, sugar, ethanol and mass media communication.

Al-Abbas Cement produces and markets high quality OPC, SRC and Blast Furnace Slag Cement under the brand name of "Power Cement".

Power Cement is the only cement which is produce on VR-7 cement grinding mill, which incorporates the latest developments in cement manufacturing technology.

Traditionally Cement grinding was done in ball mills. The latest advancement in this field is the introduction of Vertical Roller Mills (VRM). Whereas in the old ball mill technology, grinding takes place through impact of grinding media, the VRM uses rollers on a grinding table applying grinding pressure via a hydro pneumatic

spring system allowing adjustment in particle size by integrated high efficiency classifiers

In a VRM the material is ground, classified and when necessary dried (by exhaust gas or an auxiliary hot gas generator). Coarse material from the grinding table is returned via the reject transport system to the feed material.

Only fine ground product from the integrated high efficiency classifier leaves the mill which enhances the strength properties of cement especially the early strength.

Table below gives a comparison of strength enhancement achieved by using VRM in place of ball mill.

Comparative Compressive Strength of OPC at 3,300 cm ² /g Blain		
Days	Compressive Strength in psi	
	Ball Mill	VRM
3 Days	2100	2250
7 Days	3500	3700
28 Days	6090	6250 Source : FLS Denmark Brochure

Power Brand OPC, SRC and Slag cements are the only cements available to the consumers of Sindh and Balochistan which are produced on the latest technology Vertical Roller Mills.

Therefore when you use Power Brand Cements you reap the benefit of enhanced strength properties at no extra cost. Our company philosophy remains to produce & market quality products efficiently priced for its customers.

We provide TOTAL PLASTIC CARD SOLUTIONS for all kinds of Plastic Cards and Cards manufacturing equipment. We offer a full design and consultancy service to help you develop your Plastic Card Programme. Let it be your Staff Identity Cards, Access Control, Time Recording and Attendance Systems, Proximity Cards (RFID), Membership Cards, Loyalty Cards, Luggage Tags, Pre-Paid Phone Cards or On-site Badge issuance system at Conferences, Seminars & Exhibitions, our team of experienced and qualified professionals await your queries to provide you Total Solutions.

Our Plastic Cards are compatible with all leading Proximity (RFID), Magnetic and Barcode systems. For those using their own in-house Card Printing Solutions on Thermal Printers, we provide a wide range of pre-printed options, supply of consumables and accessories at competitive prices.

Our products benefit from efficient in-house manufacturing processes implemented by a highly trained production staff. Our R&D team is constantly engaged in research and evaluation of card making materials, ink-supply systems and plastic card manufacturing equipment. For those interested in establishing their own low to middle volume card production business, we provide full support and professional expertise.

Alainco-TAMS, our low-cost Time Attendance Management System is designed and targeted for small to medium organisations providing efficient and effective attendance management using Fingerprint recognition, Barcode, Magnetic & Proximity Cards and other Biometric devices.

On-site Badge issuance and Registration system for Meetings, Incentive, Conventions and Exhibitions. We provide international standards in delegates and visitors registration process and Badge issuance.

Service Providers of Visitor Registration and on-site Badge Issuance for IDEAS Pakistan.

Contact Person: Mr. Ahmed Nadeem
Designation: C.O.O.

Alfapen is a joint collaboration between Alfapen Turkey and its Pakistani counter part. Alfapen is the fourth largest manufacturer of uPVC doors and window profiles in Turkey with a production capacity of 40,000 meters per day.

It has been successfully catering to the needs of its valued customers since 1994 by subscribing to optimum quality standards. This claim is authenticated by

KEMA ISO 9001, 9002, 9003 certification and adherence to TSE 5358 and Dutch DIN standards. Alfapen uses state of the art German Technology and blend it with Turkish craftsmanship to produce 26,000 tons of quality uPVC profiles annually.

Alfapen is a pioneer in introducing uPVC profiles in Pakistan. Apart from our local objective of serving pan Pakistan we also intend to be the hub for further expansion to other South and South East Asian countries.

The first of its kind joint operations started in Pakistan in 2006 with an objective of providing its valued clients with:

- European standard uPVC window and door system which are dust, insect, water and sound proof and UV resistant
- Local Customized Fabrication
- Skilled installation
- Glass Treatment & Glazing
- Qualified after Sales and Support services

Fabrication Plant in Pakistan:

Local fabrication facility in Karachi & Islamabad puts us in a unique position of customizing the product to match the needs of the customers without compromising on quality.

Both plants are fully automated based on pneumatic system and equipped with modern European machinery. All the profiles and relevant accessories (German, Dutch and Austrian origin) are imported.

Some of our projects include Creek Vistas, Bahria Town, Avari Hotel, South City Hospital, ENERCON Building, Civil Hospital, Ziauddin Hospital and many industrial & residential units.

The foundation of Allied Group was laid by Mr. Aftab Ahsan in the year 1981, keeping in view the growing demand of quality product of Manufacturing Copper Rod, Enameled Copper Wire and Copper Strip. The Group Imported latest Furnace and plant for manufacturing Copper Rod. These products initially were manufactured under the technical Collaboration of Hitachi Japan.

With the passage of time the Company groomed by providing quality product and making its own position as market leader. The Company flourished vertically & horizontally and BY THE GRACE OF GOD today we are the largest Manufacturer of Copper Rod with installed capacity of producing 80,000 Metric Tons per Annum. High Quality (Grade-A) LME Registered COPPER CATHODE is Continuously Coated and hot rolled (Micro Processor Controlled) to produce Copper Rod of having purity of 99.99% which is basic raw material for all Wire & Cables Industries which includes House

Wiring Distribution & Power Cables, Enameled Copper Wires & Copper Strip Paper Coated & Bare and Telephone Cables.

The Copper Rod Produce by us conforms to all International Quality Standards. As stated above we are in the market for over 25 years producing Copper Rod & Copper Enameled Wire, Our products are widely used in the entire country in almost all Electrical equipments. It is being tried & considered as most satisfactory product by our valued clients, In this connection we reproduce on next pages three of the country's largest producers of best quality equipments in Pakistan namely Siemens Pakistan Engineering Co. Ltd, Phillips Electrical Industries of (Pakistan) Ltd. and Pak Elektron Ltd. popularly known as PEL.

We planned the expansion of our operation facilities and diversification of product range manufacturing low voltage Cables with a foresighted vision, innovative approach and developed technology obtained from our Collaboration from China. We have professional team; excellent infrastructure facilities and sales network with an ultimate objective of customer's satisfaction, quality and safety.

Today we are the Prime supplier in market producing an average of 70 tons of Copper Rod per day, which include Electric Cables Enameled Copper Wire & Copper Strip. It is our ability, teamwork, and true spirit, which enable us to share our Country economic growth and globalization.

On advice of our Technical collaborator large some of money has been spent on equipping & staffing of Laboratories for the reliability of raw material used in the manufacturing of Cables & further new technique has been applied through Collaboration which ensures that our

products are of the best quality and always abreast of the latest Cable making technology in the world.

The Company Goal is to accelerate further to use its best quality raw material in Pakistan resulting in the reduction of cost with quality assurance by providing 99.99% pure quality Copper products to produce Wire & Cables with the aim to reduce consumption of electricity by providing easy flow of current with minimum resistance to reduce electricity Bill and optimum performance.

Alnoor Tiles a building material division of Alnoor Refractories Ltd. which was established in 1987. Alnoor Refractories Limited (ARL) is one of the leading manufacturers of Fireclay Bricks & Tiles in Pakistan.

The Company is ISO 9001:2008 Certified and operates two manufacturing units in Northern part of the country with an annual peak capacity of 25000 tons of shaped products.

NESPAK has selected and approved Alnoor Ceramics Tiles especially because of its long life, durability and the unique architecture look that it provides to the buildings. A number of domestic projects and mega projects like International Islamic University (Islamabad), PAF Complex (Hasanabdal) have been built using Alnoor Tiles.

Based on natural Fireclay Raw as the starting material, AC Tiles are processed under controlled mechanized conditions, then pressed under heavy duty Hydraulic & Friction Automatic Presses for extra compaction and finally fired at temperatures as high as 1500^o C.

No artificial ingredients, colors or pigments used in entire manufacturing process. This brings Alnoor Ceramics Tiles with following salient features :

- Life time Natural Beauty (No artificial ingredients, colors or pigments used in entire mfg process)
- Durability & High Strength
- Excellent Insulating Properties
- Flexibility of customized Sizes and Designs.
- Easy Installation

Quality Control

Alnoor Ceramics is fully equipped with State-of-the-art Quality Control and Research Centre to ensure products composition and properties Brick by Brick.

Certifications

ISO 9001: 2008 Certified from UKAS and PNAC (Pakistan National Accreditation Council)

Breton is world leader in the stone market industry for its plants and technology for manufacturing and processing compound stone, with an absolutely exclusive know-how, fruit of ongoing research and innovation which started back in 1963.

BRETON's range of production includes machines and plants for working natural stones such as marble and granite, numerical control machines as well as

complete plants for the manufacturing and processing of engineered stone to which our exclusive patented technologies are applied.

Breton plants for manufacturing compound stone are installed in over 50 countries worldwide, with an annual production estimated around 40 million square metres. The commercial success of Breton plants is demonstrated by the substantial and rapid increase in the consumption of compound stone on the world market.

Using these plants, you obtain products featuring outstanding aesthetic and physical-mechanical characteristics, and suitable for any type of application in the building and interior decoration field (floorings, indoor and outdoor cladding, components for interiors, kitchen counters, vanity tops, table tops, etc). According to the selected plant and the product the customer wants to obtain, different raw materials are used such as marble, granite, silica sand, quartz, etc. as aggregates, and polyester resin or cement as binder.

Meaningful Partnership between: EPIC ECO Slovenia (Europe)

Cellpor Building Solutions Pakistan

"Epic d.o.o.", Slovenia is a manufacturer and marketer of the composite formwork system EPIC ECO. The company sells and rents EPIC ECO System all over the world.

EPIC ECO formwork system is a unique solution in the construction of foundations, walls, shafts, columns, slabs, and is considered as a revolution in the construction industry.

EPIC ECO system formwork panels and other elements are suitable for manual erection because of their light weight. It is simple, user friendly and has good mechanical qualities hence extremely durable. It is made of mixture of polypropylene, compounded plastics and special fibers, which enables formwork to hold high pressures of concrete. The speed of erection and dismantling is very fast.

Hence it is possible to complete projects in record time and save tremendously in the high labor costs and other overheads. It is also possible to control escalations of input materials such as reinforcement steel and cement etc. by speedy construction.

System Formwork is the most important part of the civil works project activities on the construction sites and plays a major role in timely completion of projects.

The company's ongoing policy is to continuously bring improvement and innovation in the system formwork and serve the construction industry globally by making available the most user friendly system formwork. In this regard EPIC ECO has developed EPIC ECO SKY SPEED which is a new fiber-glass slab system and other novelties such as new panel element (in blue color) made of high density plastic material. It can withstand pressure of more than 120kN / 2400 psf and represents one of the most compact elements of ceiling and wall paneling in the world. Its characteristics can be compared with steel formwork panels, but EPIC ECO system is much lighter (17 kg)."

The unique system formwork from EPIC ECO is already used in Europe, Asia, Middle East, South and North America and Australia. The marketing and sales activities are being conducted through direct offices in majors markets of the

work and through exclusive agents/representatives in the emerging markets. Pakistan market is growing rapidly and is being represented by M/S Cellpor Building Solutions, Karachi.

Chabros Int'l Group, ISO - Certified and acknowledged in different markets due to its reputation of high quality products and Exceptional service, is a well known name in wood and veneer supplying.

The Group has been in operation since the 1960's, and has grown from a single company based in Beirut into a group companies distributed throughout the G.C.C, Levant and North Africa, with over 300 employees in its current branches: Beirut, Dubai, Abu Dhabi, Riyadh, Jeddah, Muscat, Doha and Cairo. A plan to extend further into the region is already in progress.

Chabros is considered as a trademark in the region, as its product lines range from the standard to the exotic from different origins around the Globe. Through its affiliates all over the world, Chabros Int'l Group procures raw material of high standards and qualities to meet the demands if the different markets in Africa, Asia, and Australia. Due to its strategic alliances with mills in Ukraine, Yugoslavia, Africa, U.S.A. and Europe, which are responsible for sourcing, cooking, cutting/slicing, drying, grading and supplying the various wood products,

the Group has expanded its chain of supply to incorporate all wood related activities from A to Z. Because of its cognition of the different markets and its keen interest in growth and development, Chabros Group has extended its services to include production and not just supply of raw material. In its different locations, Chabros facilities are equipped with cutting, slicing, pressing and laser machines for the production of lay-ons, veneered boards, and Marquetry/Parquetry designs.

In addition and in its quest for innovation and diversity to meet its clients' every need, Chabros Group has broadened the spectrum of its product lines in the past year to include Mother of Pearl laminates, Engineered and Solid Flooring, Decking, and Reconstituted and Dyed Veneers.

Dadex was established as a public limited company in 1959. With the passage of time, it expanded its operations to meet the changing needs of the country.

Headquartered in Karachi, today, Dadex has three manufacturing facilities based in Hyderabad, Karachi and Sunder Industrial Estate (near Lahore) equipped with state of the art machinery. Dadex also has its own rubber plant located in Karachi producing top quality rubber rings for pipes. We are the exclusive licensee of Wavin b.v. of the Netherlands in Pakistan. Ranked as the largest pipe extruder in Europe, Wavin stands as the unrivalled plastic pipe manufacturer in terms of product range.

To fulfill needs of customers for water supply, drainage, sewer, gas distribution, internal plumbing, roofing, irrigation, cable ducting and multiple industrial applications, Dadex offers a range of facilities including:

1. Thermoplastic Pipe Systems:

- PVC-U Pressure Pipe Systems for Water Supply
- PVC-U Tubewell Casing and Screen Pipes System
- Dadex PVC-U Pipe Systems for Electrical Conduits
- Nikasi Complete PVC-U Soil, Waste & Vent System
- T-Flex (PE) Pipe System
- Polydex (PPR) a Premier hot & Cold Water System
- Flowline complete underground PVC-U sewer pipe system

Also Included in the Product range are:

- CC Pressure Pipes
- CC Sewer Pipes
- CC Corrugated Sheets
- CC Nalidar Beams
- Rubber Rings for Pipes

2. Aluminum Composite Panel

Dadex also supplies Aluminum Composite Panel in a variety of colours to suit customer needs. These can be used in various projects such as commercial buildings, corporate offices, banks, hotels, retail outlets, etc.

3. Agriculture and Irrigation

Pakistan having an agri-based economy needs to have effective and efficient agriculture solution. ZarKaasht division of Dadex offers a range of agricultural solutions that will increase the yield by manifolds while conserving water.

Health, Safety & Environment (HSE)

The company places tremendous importance towards safety and health of its employees, product users, environment and public at large.

Dadex Golden Jubilee

It is indeed a commendable achievement that the Company has achieved 50 years of sustained growth. It has been made possible not only by the hard work and commitment of Dadex staff but also by the valuable feedback received from our product users.

DIZAYN TEKNIK PLASTIK BORU VE ELEMANLARI SAN. TIC A.S.

Namik Kemal Mah. Inonu Cad. #6, Kirac
Buyukcekmece, Istanbul 34522,
Turkey
Tel: 90 212 8865741
Fax: 90 212 8865193
Email: export@dizayngroup.com
Web: www.dizayngroup.com
Contact Person: Canan Tekoemiekoparan
Designation: Int. Marketing Exe.

Dizayn Group was founded in 1987 with the objective of developing and carrying out projects in heating and plumbing sectors. In September 1992, our company started producing under-floor heating pipes and indoor plumbing pipes called PP-R.

Through promotions and training activities, Dizayn Group has had a great effect on spreading the use of plastic pipes and fittings in Turkey.

Dizayn Group appropriates 4% of her turnover on R&D activities. The quality of the products is certified by testing institutes, which are internationally certified. Some of these institutes are as follows: SGS ISO 9001:2000, WQC (England), DVGW (Germany), Hygiene Institute (Germany), CMA (China), GOST (Russia), GOST (Ukraine), ZIK (Croatia), EMI (Hungary), Agreement Technic (Rumania)

Dizayn Group exports her products to more than 80 countries, primarily to the ones located in Middle East, South America, Western and Eastern Europe, Russia, Northern Africa, and Far East. While Dizayn Group had 34 patents, this number has increased to 85 today. Furthermore, Dizayn Group has been awarded in July 2004 by Turkish Patent Institute for her attribution to technological developments in Turkey and in world.

The success achieved by Dizayn Group in such a short period of time depends on her three missions:

As a result of Product Development Mission, Dizayn Group produces high pressure pipes from 12 mm to 1600 mm diameter, and low pressure pipes from 50 mm to 3600 mm. These pipes are durable to heavy soil and traffic load made of Polietilen and Polipropilen through which fluid can easily flow.

Dizayn's product range covers 4000 types of products, produced using 23 different complete systems. Products developed by Dizayn Group are as follow:

Sanitary Product Group

- Inbuilding Fresh Water Systems
- Inbuilding Waste Water Systems
- Inbuilding Heating Systems

Infrastructure Product Group

- Potable Water Systems
- Sewage Systems
- Natural Gas Systems
- Pre-insulation City Heating Systems

Agricultural Irrigation Product Group

- Drip Irrigation System
- Rain Drainage Irrigation Systems
- Drilling Pipes

Radiator Product Group

- Aluminium Panel Radiator
- Panel Radiator
- Towel Radiator

Dizayn Group is the first company to produce 1600 mm diameter pipes under PN 12,5 pressure in October 2001, which is a world record. This product, which is deemed as impossible to manufacture by her competitors in international arena, was produced by Dizayn Group using a newly developed extraordinary technique.

By means of her Investor Mission, today Dizayn Group continues her production activities at three different plants on 35 thousand m2 closed area and for the future, through new investments and new international partnerships to be established, Dizayn Group plans to become a very strong company conducting her activities in two main areas classified as domestic and international markets.

As a consequence of Project Development Mission, Dizayn Group takes the flowing substances (water, gas and etc.) from the places where they are plenty and transmits them to the places where they are scarce. This way, Dizayn Group develops projects

for city heating, drinking water distribution and agricultural irrigation. In order to achieve this, the company designs complete systems and establishes plants for these projects. The "Cyprus Peace Water Project" whose patent belongs to Dizayn Group provided water to Cyprus who faced a serious water problem for several years.

In Dubai Palm Island Project, which is said to be one of the most prestigious 3 projects in the world Dizayn's products have been preferred after eliminating our global competitors, Some of the projects accomplished by Dizayn Group

- Porto Arabia- Qatar
- Capital Plaza-Dubai
- Buhara and amarkand Water Supply Project –Uzbekistan
- Hong Kong Inter-Islands connection Project
- Büyükçekmece Sea Discharge Project-Turkey
- İzmir Enka Bechtel Electric Santral Project-Turkey
- Holland Bechtel Electric Santral Project
- Salihli City Heating Project-Turkey
- Palm Island in Dubai
- Old Town Burj Dubai
- Nile River Undercrossing Project-Sudan
- Purpose of Cooling Water Supply to Gaza Power Plant
- Sewage System Rehabilitation Project of İzmir-Turkey

Dizayn Group tries to prevent the usage of low-quality pipes that do not conform to the standards through making tests in its fully equipped Mobile Laboratory that travel all around Turkey. Dizayn Grup , producing its own know-how by her strong R&D personnel has started constructing a pipe production plant in Azerbaijan on a 50/50 shareholding basis between Dizayn Grup and a local shareholder.

Dizayn Group, which conducts several successful projects in Turkey and abroad, has been awarded with the Water and Water Management prize by UNESCO as a result of the project realized in Khartoum-Sudan. Award ceremony was held in Cannes, France under the title of "Water Symposium" on 25 June 2003 and the award was presented to Mr. Ibrahim Mirmahmutogulla, Dizayn Group President of Board of Directors. The most significant aspect of this award was that, it was given to a private company for the first time in its history. In addition, at the world final of World Young Business Achiever Competition, which is an international organization to which many countries participate including Germany, England and Holland, Mr. Ibrahim Mirmahmutogulla, represented our country and has been awarded with the Great Prize.

Today there is a dire need of providing the people of Pakistan with safe drinking water and proper sanitation system. To cater this objective Euro Gulf Industries was established in the spring of 2006. Its directors had been a part of the pipe industry since 1971. His rich experience and the desire for growth of Pakistan's Economy led him to invest significantly in

modern technology and machine, so as to ensure consistent high quality products, and quick responses to market demands.

Today, Euro Gulf Industries is one of the leading Polymer Pipe & Fitting Manufacturer in Pakistan. It specializes in manufacturing PPR, PE cPVC, uPVC Pipes and Fittings. Its facility is among the only two in Pakistan which manufactures all three types of Pipes available in Pakistan. It manufactures pipe ranging we have to specific range of different pipes from ½” to 16” and more than 120 different kinds of fittings. Its products are supplied all over Pakistan. The lower diameter pipe (i.e. ½” to 6 “) is usually used and supplied to the commercial market and its higher diameter pipe (6” onwards) and PE pipe are supplied and used in government, semi-government and special projects. More recently, cPVC pipe & fittings have also been manufactured and made available. Apart from its ISO 9001 - 2000 Certification it is certified by PCSIR, PSI and Pakistan Engineering Council. It is also registered in different government and semi-government departments. It manages its own Distribution System to ensure availability of its product all over Pakistan.

Brief History of the Company

Faisal Sanitary Fitting Industries (pvt) Ltd, established in the year 1974 is one Pakistan's leading manufacturing Company for Bathroom Sanitary Fittings.

Its products range Comprising of C.P. Fittings and Fancy Bathroom accessories are of high quality Standards which are accepted as a prestigious product and captures 55/60% of the Country's sales. We have been introducing the latest designs of Sanitary Fittings, Accessories for the last 33 years with full competency and skills.

Faisal Sanitary Fitting Industries (pvt) Ltd is manufacturing an integrated range of sanitary fittings and Bathroom Accessories. The combination of state-of-art technology, rigorous testing during the manufacturing process, and strict quality controls is the guarantee behind each and every tap that bears the Faisal hallmark.

To replace old technology of sand Casting with Gravity Die Casting of Non Ferrous metals, traditional Electroplating the company imported a fleet of latest Automatic machinery which consisted of Fully Automatic complete Foundry imported from Italy consisting of Electric Furnace, Shot Penning machine, Core Shooting Machine and Gravity Die Casting machine, Arc Deposition Technology These machines have taken place of our old sand casting and Die casting process. In the same manner Automatic and semi Automatic Injection Molding machines have been imported from China to give optimum performance.

Our Engineers put their skills to introduce the latest, durable and comfortable designs/models to the entire satisfaction of our valued customers. This credit to Faisal Sanitary Fittings Industries compelled the competitors to copy it. Hence its products

are being checked throughout the process of production and as such we claim that we always maintain the quality and standard.

Contact Person: Mr. Muhammad Yousaf
Designation: Director

Providing Piping System for water supply schemes

Hong Kong Pvc is one of the Pakistan's largest integrated companies. Headquartered in Karachi, Pakistan, we conduct business in all over the country. We are engaged in every aspect of the sanitary and water supply projects, including production, manufacturing, marketing and transportation, pipe & fitting. We're also investing in renewable and advanced technologies in terms of modern sanitation aspects.

Company Roots

We trace our earliest roots to a 2006 discovery at Hong Kong, of China, which led to the manufacturing of the Pipe and fittings in Pakistan by the technical support of well known company J.N.M Designer. That company later became Standard pipe and fitting manufacturer of Pakistan and, subsequently, Hong Kong. We took on the name "PK ARAB" as brand of our u.Pvc pipe according to American Standard (ASTM D-1785), British Standard (BS-3051& PS3051) and fitting on American Standard (ASTM D-2466) doubling our countrywide proved pipe and fitting reserves.

Technologies

Technology is propelling our growth. We're focusing on technologies that improve our chances of finding, developing and producing new ideas and modernize u.Pvc Pipe and Fitting availability in Pakistan.

We recognize that the country needs all the modern water& sanitation ideas we can develop, in every potential form. Our employees work daily to find sectors, where our product is needed and make efforts to power the country and its infrastructure.

Designation: Partner

Karachi Mill Stores is a registered partnership family concern firm having five partners. It was established during the year 1961. Since then we are working as a supplier for government, semi-government and private firms.

In Pakistan, we are distributor for:

- Rawl, UK - Fixing Products (Sole Distributor in Pakistan)
- Bohler Austria - K100 Carbon Steel
- Erassteel ,UK-Silver Steel Rods of different sizes,
- Diplomat, Korea - Fire Resistant Safes, and File Cabinets
- Hardware Tools & precision measuring instruments
- Rockle, West Germany – Master Precision level

Karachi Mill Stores' pricing is highly competitive with industry standard. We believe that client deserves high quality solutions, delivered in a timely manner with reasonable price using economics of scale and efficiencies of manufacturing, operation and logistics arrangements.

The Partners of Karachi Mill Stores believes that beside knowledge, intelligence, motivation, competence and experience to be a leader it takes vision,

charisma, courage, boldness and character as well. This is especially true in the current era where technology-intensive companies are increasingly dependent on human capital to create value.

Designation: G.M. Marketing

Focusing on sustainable development with strategic planning and relentless drive to meet the ever challenging global demands, Lucky Cement Limited, owned by Yunus Brothers Group of Companies, is the largest cement manufacturer of Pakistan and is the top exporter of cement from the country. With major emphasis on quality control to manufacture cement far better

than the limits set by Pakistan, British Indian, Srilankan and South African Standards, Lucky Cement has production facilities as well as captive Power Plants in both the northern and southern parts of Pakistan and has production capacity of more than 25,000 Tons per day that is further being expanded to more than 29,000 Tons per day.

Lucky Cement has the maximum share in this capacity enhancement. The Company was incorporated in 1993 as a public limited company with production capacity of 4,200 Tons per day.

Lucky Cement Limited during the past five years has successfully commissioned four state of the art additional production lines, each having capacity of 4,200 Tons per day.

This coupled with the successful optimization of the initial 4,200 Tons per day Plant to 5,040 Tons per day, has resulted in enhancement of the total production capacity to 25,000 Tons per day. The facilities in north west frontier province comprise of 4 production lines in Pezu distt. Lakki Marwat and in south consist of 3 production lines at Super Highway, Karachi.

To ensure supply of uninterrupted power to the Cement Plants, Lucky Cement has state of the art captive Power Plants at both the production facilities. The Power Plant operating in Pezu, NWFP consists of 10 Wartsila Diesel Engines with generation capacity of 72 MWH.

These Engines are being converted to dual fuel to reduce the emissions as well as the generation cost. The Power Plant at Karachi consists of 5 gas fired and 2 dual fuel CATMAK Engines with combined generation capacity of 43 MWH.

Brands to suit every user

Lucky Cement aims at producing cement to suit every user. At present, Lucky Cement manufactures Ordinary Portland Cement (OPC) and Sulphate Resistant Cement (SRC) and has plans to produce Slag Cement as well.

Lucky Cement Limited has been sponsored by Yunus Brothers Group (YB Group) which is one of the largest business groups of the Country based in Karachi and has grown up remarkably over the last 50 years. The YB Group is engaged in diversified manufacturing activities including Textile, Spinning, Weaving, Processing, Finishing, Stitching and Power Generation. The Group consists of a number of industrial establishments other than Lucky Cement Limited, they include:

- Lucky Textile Mills
- Fazal Textile Mills Limited
- Gadoon Textile Mills Limited
- Lucky Energy (Private) Limited
- Yunus Textile Mills

Lucky Cement has been successful in establishing its brand in several export markets including Middle East, India, Sri Lanka and East and South African countries. We are also planning to setup some offshore facilities to further strengthen our export business on regular basis.

Competitive Strengths

The success and continuing growth of Lucky Cement are based on the following competitive strengths:

- Leading cement producer Pakistan with proven track record
- Leading exporter of cement
- Strategic Location
- Efficient Operations and Expansion and Economies of Scale

- State-of-the-art machinery and facilities
- Seasoned and devoted management and professional employees

The objective of Lucky Cement is to be the market leader in both the domestic and export cement markets. In order to achieve this objective, the business strategy of Lucky Cement is focused on the following key elements:

- To maintain position as the market leader in cement production.
- To increase margins by increasing exposure to the export markets.
- To be the lowest cost cement manufacturer in Pakistan.
- To have a strong distribution network as well as brand recognition.

Designation: Country Manager

From small beginnings in Jabel Ali, Dubai, U.A.E. in 1997 Mammut Building Systems has grown to its present position as one of the two leading sellers of Pre-Engineered Buildings in the Middle East.

Since 2000, Mammut has been on a steep upwards trajectory to market leadership and its growth continues strongly, fuelled by its investments in people and technology.

Our aim from day one was to produce steel buildings of the highest standards. To reach that aim we spared no expense to set up a factory with the best and most sophisticated machines engineering software money can buy. The biggest asset of our company, however, is our team and teamwork.

We have a total production capacity of 10,000 tons of steel buildings per month and over 180,000 sqm of polyurethane injected sandwich panel per month.

Our workforce consists of 2000 professional having a combined experience of over 100 years in the field of Metal and Structural Steel Buildings.

MAPLE LEAF CEMENT FACTORY

42-Lawrence Road
Lahore, Pakistan

Designation: GM (BD)

MLCFL was incorporated on 1st July, 1992 which is the third largest grey cement manufacturer and leading Specialised Cements (White Cement and Oil Well Cement) manufacturer in Pakistan. The plants are strategically located in Daudkhel (District Mianwali), which is rich in raw materials required for production of cement.

MLCFL focuses on the continuous innovation in activities e.g., through creation of new products and manufacturing processes, which creates value for the company and other key stakeholders.

WHITE CEMENT - Building Material of the Future

MLCFL White Cement based products have a large undiscovered potential that provide opportunities to challenge the known world and take aesthetics to the new frontiers. Creative ambitions combined with building material of the future will provide mankind with a more beautiful and individually expressive world.

MLCFL White Cement is the perfect choice for decorative work. The pure white color allows the opportunity to choose among all the colors of the choice from spectrum to create any shade through countless designs and applications.

The technical qualities of MLCFL White Cement offer a lot more than just wall and floor finishes. Changing the popular perception for white cement as this is considered to be only good for repair job, as adhesive and joint filler. However, with MLCFL White Cement one can beautify, decorate, design and redesign ones living place. It is really a dream tool for the creatively inclined.

Specialised Use of White Cement

MLCFL White Cement provides stylish alternatives for floors, walls and many other surface decorations which uniquely reflect ones imagination and characteristics. Its astonishingly high refractive index and opacity impart a brilliant luster and smooth finish, even when mixed with pigments.

MLCFL is providing the cement that is pure, super white and mixes easily with inorganic pigments. Focusing the requirements of each market segment and keeping in view the cost competitiveness MLCFL White Cement can be used for relevant specialised products as;

- Foreground Flooring:
 - Terrazzo Tiles,
 - Mosaic Tiles,
 - Pavers Tiles
 - Chip Flooring etc.
- Background Flooring for Marble Tiles adhesion,
- Grouting, adhesive & joint fillers,
- White cement paints, white cement wash & weather shield etc.,
- Sculptures, garden ornaments,
- Smooth, exposed or textured Plastering.

Master Thermoshield

Pioneers in the latest insulation technology

The conservation of energy is the only solution to ever-increasing energy costs and its diminishing resources all over the world. In Pakistan, a huge amount of energy is consumed either in heating or cooling our homes and other constructions, which accounts for a large chunk of power consumption. In addition to that, a large amount of energy is wasted only due to improper insulation or without it.

Background

Master Group of Industries - the makers of Molty Foam and a leader in innovative products development since 1963, has been at the forefront to come up with products that are user beneficial because of their cost effectiveness and also because they adhere to all quality and environmentally sound standards.

Master Thermoshield

Master presents "Master Thermoshield" polyurethane Insulation that saves up to 50% energy and reduces electricity bills. Generally, packing materials are sold as Insulation materials in the markets which have no where near the benefits of PU spray foam insulation. Master Thermoshield not only provides benefits far greater than traditional materials but also pays for itself through energy savings, air quality improvements, noise reduction & overall strength improvements.

Only Master Thermoshield provides the most proper insulation for your existing or under-construction houses, industries and cold storages.

Master Thermoshield uses the top quality raw materials imported from different origins. This is the same insulation material used in refrigerators, deepfreezers, insulated vacuum flask, hot pots, water coolers, cold storages, refrigerated vans and porta cabins etc.

Master Thermoshield helps maintain a comfortable constant temperature throughout the building which makes your living environment comfortable and relaxed. It makes houses, offices, textile mills and other industries to stay cool in summer and warm in winter which creates serene ambience.

Latest insulation technology

Master Chemicals Ltd has been the pioneer to introduce the latest insulation technology in Pakistan. Prior to this, conventional materials were used for thermal insulation. These products have high thermal conductivity & offer insulation with joints hence they were neither water resistant nor energy efficient.

The benefits & high performance of PU spray foam insulation is making the Architects, Builders, Contractors & Building owners to switch over to Master Thermoshield which is one of the most efficient insulation materials in the market today.

Salient features of Master Thermoshield

- Offers seamless (joint free) insulation, therefore, absolutely water resistant.
- R Requires only half the thickness to prevent heat conduction very effectively as compared to other materials.
- E Extremely lightweight and perfectly weather resistant.
- P Penetrate the cavities between the walls and roof while bonding strongly with wood, metal, plastic and concrete.
- E Easily applied to even as well as uneven surfaces to create a uniform surface.
- Remains unaffected in severely hot or cold weather.
- Easily applied without any annoyance in a very short time.
- Tiles or plaster can be applied on Master Thermoshield.
- Its thickness or bulk is adjustable as per requirement.
- Advantages and importance of Master Thermoshield have already accredited by renowned architects of Pakistan.

Advantages and importance of Master Thermoshield have already accredited by renowned architects of Pakistan.

Master OffiSys (Pvt) Ltd being the pioneer of Posture Care Series in Pakistan introduced Ergonomic Office Chairs in 1999. Master Chairs offer options to choose any fabric / leatherette / genuine leather for upholstery in high back, low back and visitor chairs.

Master office chair is a culmination of comfort, technology and quality that bring a refined mode to repose your body with a perfect lumbar support. Chairs are available for executives, secretarial, auditoriums, theaters and waiting area.

We have also introduced "Master Junior Series" for kids to make them study with fun. Apart from these, Master OffiSys has introduced "Molty Relaxor Series" for home theatres, lounges, executive offices and bed rooms.

Master OffiSys (Pvt.) Ltd., aiming to provide optimum solutions for efficient work environment; has now introduced a full range of workstations that includes several lines of systems such as partition system with smart wire management, office tables, executive tables, sofas and file storage systems.

Master OffiSys will now be the real solution provider for all furnishing needs within the budgetary constraints for any office.

MAYA THE INTERIOR SHOP

364-B, Ghazi Salahuddin Road
Adamjee Nagar
Karachi, Pakistan
Tel: 92 21 34520911, 34556016
Email: maytechmaya@gmail.com
Contact Person: Mr Aslam Yaqoob Bawani
Designation: Proprietor

Maytech Engineers was established in 1984 to cater to the Engineering and technological needs of family's own Textile and Garment industries. In 1991, the company started making Wrought Iron Furniture and lights, using solid materials and modern techniques to blend in the cast iron, copper and brass.

We were the pioneers in using hand forged and hand hammered materials in Pakistan. The Hammered effect gives depth to different colors. These items soon captured the market and were exported to USA and Middle Eastern Markets. In 1998, a wooden furniture making facility was added to the existing factory. SHEESHAM (Rosewood) is a local wood with very good grains and dark color and is mostly used in the local market. Hand carving with intricate floral and geometrical patterns is also very popular.

Furniture is also been manufactured in imported MDF with resin motifs and Deco Painted in many different flat, textured, antique & patina finishes.

In 2005, a display showroom for local customers in the name and style of 'MAYA - The Interior Shop' was established in Karachi. We welcome customer's own designs and color schemes as we value our client as the most knowledgeable person of their own markets.

National furnishers took a humble start of making furnishers in 1970. Honesty, hard work and punctuality paid us and today we are leading furnishers making of Pakistan.

Our present premises cover an area of 16484 Sq. Mtr. By the grace of Allaha Almighty National Furnishers name is considered as a symbol of quality today. Besides expanding our factory, we have built a most modern Show Room with our present Show Room. It is the biggest Show Room of Pakistan providing best facilities to worthy Customers visiting us. Our Show Room is most beautiful.

Under the Supervision of its Chief Executive Mr. Amjad Farooq, and Director Mr. Luqman Amjad, over 600+ workers are engaged in producing high quality

furnisher in Shesham (Rose Wood) and walnut wood in a very vast range including hand carving as well as straight line for export, domestic and commercial purpose. Our Chief Executive and director both are energetic and foreign qualified. To keep pace with the fast moving world and study latest trends, they visited abroad and develop new ideas. They've visited U.K, U.S.A. West Germany, Sweden, Denmark, Spain, Holland, Belgium, Tajikistan, Saudi Arabia, Abu Dhabi, Sharjaha, Norway and ect.

At National Furnishers, The Director, Managers, Foremen, Supervisors, and workers all work in a friendly and pleasant atmosphere. We all feel ourselves as a member of a big happy family. Dedication and hard work coupled with team work at factory had made us the largest furnishers makers. Recently we have imported and installed latest Italian Vacuum dryer for wood seasoning. This is the first machine in Pakistan of its kind.

We have production capacity of over US\$. 5 Million Per annum. Beside thousand of domestic customers, we have a large number of our valued clients. We have latest imported machinery from Germany and Italy.

We always are very conscious about our high quality Furnishers. We do no compromise on quality. To constantly maintain the quality, we have built a new big factory in the name of "BLESS BOARD". There we are manufacturing excellent and durable boards.

We are exporting furnishers To U.K, Germany, U.S.A, Scotland, Saudi Arabia, Norway, Canada and Middle East. The Government of Pakistan and export Bureau are encourage us and sending furnisher makers abroad, we expect to get business on larger scale during next year.

NEDO, BRING INNOVATION TO WORK FOR OVER 70 YEARS

NEW TECHNOLOGIES EXPERIENCE DYNAMISM OPTIMUM RESULTS

NEDO was found in 1935 by the late Mr. Mohammed Usman Kalia, as a trading company. Today under the inspired leadership of Mr. Nisar Ahmed Kalia, the present Chairman of the company, Nedo is into diversified areas and has various divisions which are working independently with their own sales, marketing, finance and customer support. Products including

AV Equipment, Banking Machines, Time Management Systems, Hotel Management Systems, LED Screens, Surveying and GPS Systems, are handling almost every customer, which are expected to grow in the near future, creating Nedo as a multi functional solution provider.

NEDO is more than top-quality, advanced technology distributor. It's a team of dedicated, trained personnel who understand both industry and needs, and are ready to suggest equipment that will improve customer's efficiency.

Every sales and service employee undergoes a rigorous training program at our home office. They are ready to put their comprehensive product and application knowledge to work to help simplify and speed customer's business operations. Much has changed since NEDO started in 1935, but our dedication to providing customers with top quality products, backed by great service, remains a cornerstone of our company.

Contact Person: Mr. Qasim Rehman
Designation: Asst. Manager Sales

Pakistan Cables Limited, the country's oldest and most reputable cable manufacturer, was established over 5 decades ago in 1953 under the sponsorship of BICC, UK and the Chinoy family. In the subsequent five decades, Pakistan Cables has earned a reputation as a market leader in the industry and a company that does not compromise on quality. Consequently, the company has gained a position as being the premier cable manufacturer in the country. Pakistan Cables is listed on Karachi stock exchange since 1955.

Pakistan Cables' manufacturing facilities and head office are located in Karachi on an 11.5 acre site. This site also houses a 2MW co-generation power plant, which allows the company to be self reliant for its electricity needs. Pakistan Cables presently employs over 400 people. It has regional office in Lahore and branch offices in Rawalpindi, Multan,

Abbottabad, Peshawar and Quetta. The company's distribution network covers more than 45 cities all over Pakistan.

The company is engaged in the manufacture of wires, cables and conductors in both copper and aluminium. In addition, Pakistan Cables also produces copper rod and aluminium extrusion profiles. Given its focus on quality, Pakistan Cables continuously reviews and improves the effectiveness of its Quality Management System in line with objectives of achieving higher productivity, uncompromising quality and maximum customer satisfaction.

Wire and Cables

The company manufactures General Wiring Cables in the range of 250/750 volts for lighting and general use. These cables are manufactured in conformity with national and international standards and provide safety and savings in electricity consumption because of the use of 99.99% pure copper, cable grade PVC and thorough quality tests on every meter of cable.

To cater to the requirements of projects, industries and utilities, Low Voltage (LV) and Medium Voltage (MV) cables are manufactured which are subject to rigorous in-house quality checks. LV and MV cables have been fully type tested by KEMA - Holland in accordance with IEC 502. Furthermore, Pakistan Cables provides high quality overhead conductors to utility companies, which are manufactured from EC Grade Aluminium Rod and Copper Rod.

Pakistan Cables also manufactures wires for harnesses used in automobiles. These wires are produced in a state-of-the-art plant that became operational in 2008. Other wire and cable products offered by the company include telephone, intercom,

coaxial cables and numerous types of special cables which include airfield lighting, control cables and other items to meet the requirements of customers.

Copper Rod

In 1996, Pakistan Cables set up a plant to manufacture High Conductivity Oxygen Free 8mm COPPER ROD. This plant was supplied by Outokumpu Castform OY, Finland and uses the upcast system of manufacturing rod. Oxygen Free Copper is particularly suited for drawing into wires.

Numerous satisfied customers, particularly enamel wire manufacturers, will attest to the quality of Pakistan Cables' Copper Rod. The raw material used is only LME registered "A" grade copper cathodes.

ALUM-EX

Alum-Ex is the brand name under which Pakistan Cables manufactures aluminium sections and profiles for the construction and architectural industry.

Anodized sections are offered in six different colours, while powder coated sections are available in any imaginable colour to match the taste of the customer.

All aluminium sections produced by Pakistan Cables, whether anodized or powder coated, are extruded from prime quality imported AA 6063 billets, which are internationally recommended for architectural and structural applications.

PVC Plant

In 2007 Pakistan Cables set up its own PVC Compound Plant. This plant produces flexible PVC compounds for insulation and sheathing of electric cables, and other flexible PVC compounds for sale to the local and export markets. Pakistan Cables uses the most sophisticated machinery, including automated weighing and dosing systems for each component of

the various formulations. This plant also has a polymers laboratory to enable the development of customer specific formulations.

PAKISTAN POLYPLASTIC INDUSTRIES

221-Shahzadi Market

Designation: Chief Executive

With the grace of Almighty Allah We are the manufacturers of TULIP PVC PIPES.

TULIP uPVC rigid pressure pipes are manufactured in accordance with British Standard Specifications. Our range of Products include TULIP Pressure Pipes up to 16" diameter in "B" - "C" - "D" & "E" . Class Pressure Pipes. TULIP pipes are available with integral Poly - Grip Rubber Ring Seal joint in addition to Plain end or Bell end pipes.

In 1981 Govt. of Punjab was pleased to accord its approval to the use of TULIP uPVC pipes . As a Result TULIP uPVC Pipe was approved by the Govt. of Punjab in its water supply schemes.

TULIP uPVC pipes have various advantages. Its Excellent resistance to acids, alkalies and salts ensure longer life where top and sub-soil conditions are of corrosive nature. TULIP uPVC Pipes DO NOT RUST , ROT OR CORRODE - EVER .In addition , TULIP uPVC Pipes have various advantages:-

On direct cost basis, TULIP PVC Pipes compared with contemporary pipes (C.I..G.I..A.C..Fiberglass, Ductile Iron Pipes, etc.) are price - wise competitive.

TULIP uPVC Pipes are fully backed by manufacturers warranty for free replacement in case of raw material, standard specifications or production defects.

TULIP uPVC Screens and Tubes for Drinking water and Irrigation Purpose tube-wells have far Excelled available screens and pipes of other materials such as Coirwound and steel, Brass and steel, fiberglass screen and tube combinations.

The most important reason is its Excellent resistance to corrosion and price economy factors of TULIP uPVC ScThe seriousness of premature well failure due to corrosion may be judged by the cost factors involved. These factors include not only costs of rehabilitation or replacement of the well structure, but also add to the inconvenience resulting from interruption of the water supply during the time that the well may be out of service.

TULIP uPVC SCREEN & CASINGS DO NOT RUST, ROT OR CORRODE - Ever.

PAKISTAN STONE DEVELOPMENT COMPANY

2nd Floor, ICCI Building, G-8/1
Islamabad, Pakistan
Tel: 92 51 9263465, 9263467
Fax: 92 51 9263464
Web: www.pasdec.org

Pakistan Stone Development Company (PASDEC) is a not for profit company, set -up under the Ministry of Industry Production, Government of Pakistan to develop and transform marble and granite sector. PASDEC is a subsidiary of Pakistan Industrial Development corporation (PIDC), incorporated in June 06, 2006.

PASDEC is carrying forward its vision to become globally competitive and socially responsible dimension stone industry.

The company is mandated to establish:

- Model Quarry 10
- Up Gradation 20
- Machinery Pool 02
- Marble City 05
- Common Facility & Training Centre 04
- Ware House 02
- Stone Quarry Institute in Pakistan

In short run, PASDEC is focused on achieving one goal, extraction of “square block”. This strategy will trickle down effects tremendously throughout the value chain of the industry, achieving tremendous transformational impact. The development projects of PASDEC will provide employment opportunities to far-flung remote areas and increase income incidences.

Sector Development Strategy

The Marble sector development project is a part of a compressive plan and strategy for up-grading the dimension stone industry in Pakistan. The overall plan envisages the following:

- Model quarry development and quarry up-gradation
- Industrial parks
- Infrastructure development
- Human Resource Development through Trainings
- Research & Development
- Propose policy reforms for the development of stone sector
- Value added /Export training programs in Mosaic making, inlays and handicrafts and stone.
- Strategic joint ventures in technology transfer and business promotion.

Prime Aluminium Industries is the only aluminium company in Pakistan having ultra modern microprocessor based, PLC controlled high quality aluminium extrusion press and achieving highest production in the country. PAI introduces for the first time in Pakistan the latest Multicolor Technology for electro coloring for exterior finishing of profiles. PAI offer to its customers the best aluminium extruded profiles, with the strict adherence to quality to make the products superior and incomparable in the market forms the guiding principle for every PAI employee.

With our latest PLC, EDM, Wire Cut Machines, PAI can develop dies for new sections within the shortest possible time. PAI, offers wide range of extruded profiles

in Aluminium Alloy-6063 by DUBAL (Dubai Aluminium). A T6 heat technology chamber is used to achieve the hardness of the aluminium profiles up to 15 by applying thermo dynamics. PAI assures reliability and uniformity in quality, colour and hence minimizes rejection rates, corrective fabrication and production downtime. PAI provides a natural protective layer against environmental, chemical and physical corrosive agents and hence, can never rust and used the most advanced technology to give extra protection to the profiles by making them Scratch Resistant. PAI products are available in different ranges from 12-25 microns. Prime profile requirements in various sectors like Architectural, Agriculture, Automobile, Textile, and Railway, etc.

PUNTO ITALIANO

Web : www.puntoitaliano.net.pk

RESOLE is a new and dynamic company in great expansion born from the experience of Luciano Scarinzi, an industrial engineer, who acquired it working as a consultant for various companies all over the world, and developing a growing awareness in the field of "Clean Energy". As a result, the issue of environment's protection has been taken very seriously.

The Media strike us every day with shocking images highlighting the problems generated in the past few years by carbon monoxide emissions mainly caused by the old-fashioned heating plants, which are

drying out the oil and the natural gas, such as methane. This huge natural heritage is sooner or later doomed to exhaustion.

Always searching for better products and services for its customers. As a pioneer, leader and innovator, Shabbir Tiles has had an illustrious past. Our future holds the promise of even greater achievements,

provided we remain forward-looking, performance-oriented and agile, take advantage of our strengths and overcome our weaknesses.

Since our founding in 1979, we have been moving forward aggressively on many fronts to capitalize on solid growth opportunities, to improve our operating efficiency and to sharpen our business portfolio's focus.

Today, as a result of our internal growth initiatives and several strategic and innovative initiatives, our business has grown many folds.

We have started with 6 million sq. m. capacity. Today the aggregate capacity of the Company is more than 13 million sq. m., which is enormously huge.

The Company is expecting a high growth and larger consumer satisfaction in the years to come. Over the coming years, we expect to explore more opportunities in pursuit of our goal to report an attractive turnover increase in every single year due to our commitment to all our stakeholders.

Our company is a very powerful enterprise. Since the establishment, it has won the trust and good comment of widespread customers, based on its powerful technical strength, advanced manufacturing technique, and complete high-quality after-sale service.

We carry out the ideology of "Credibility-oriented, quality-focused, and technology-based; to develop and promote superior quality and innovative products, in order to meet consumer's demands for increasingly high quality products," and welcome customers nationwide and beyond to cooperate with us!

Living up to the mission, Shabbir Tiles & Ceramics Ltd. is always searching for better products and services for its customers. We shall continue to support both present and future customers with a full range of products and services.

Shafisons Engineering (Pvt.) Limited (SSEPL) created ripples in the field of Engineering Plastics in year 1994 by launching of brand, "BETA PIPES". The main vision was to serve the nation by providing reliable, economical, environment friendly and quality driven piping systems for water and electrical distribution.

Shafisons Engineering (Pvt.) Limited, a quality conscious company, a self reliance, has the honour to obtain manufacturing license, without any foreign collaboration or technical assistance for manufacturing of PVC-U and PPRC piping system. Our product line ranges from PVC-U Pressure Pipes, PVC-U Electrical Conduits, PVC-U Soil Waste and Vent Pipes and Fittings.

In addition, our 'Customer Care' department offers a variety of services including technical support, design proposals and estimates, customized tools and techniques which are to be followed up by regular feedback in order to determine customer satisfaction.

Our entire management is committed to the motto of "Service and Quality". The company has been awarded and accredited

with various forms of prestigious recognitions in line with the innovative and successful journey with a mile stone in the form of achievement of "BRANDS OF THE YEAR AWARD 2006- 07" on 6th of November, 2007 by the Honourable Prime Minister Of Pakistan.

Our most important asset is our professional work-force, which has played a pivotal role in turning dreams into realities by sheer hard work, team-working and constant focus on delivering services internally and externally to harness core competences, brand loyalty and customer satisfaction.

SSEPL became the first company to supply PVC-U Pressure Pipe 20" diameter to Engro Polymer & Chemicals Limited, Pakistan Polymer & Chemicals Limited, Pakistan.

SK Stones is fully equipped both technically and aesthetically. Here we understand what great responsibilities we get ourselves into when we treat these charismatic children of nature. All technical facilities of processing marble and onyx we have are up to date and in class of their own, but what we treasure most is not the technical excellence rather we are proud on what we have been able to produce through our creative minds and our dedicated team. These Stones are part of our lives, an essential one which gives its colors, its soul and its amazing attitude to lighten the dark areas of our surroundings. This is a treasure and it is treasured by SK Stones.

Style & Comfort has given a new dimension to indoor and outdoor furniture with an optimum level of comfort, which makes all the difference to your home. Our craftsmanship is second to none. Every piece is made to exacting standards, with great attention to detail and finish.

At Style & Comfort, customers receive an exceptional service for their requirements. Furniture can be custom-built and ready to take home. The range of furniture we have covers the entire home, from bedroom to lounge, to garden. For elders to toddlers, we have something for everyone.

We have listened to and learned from clients in our Zamzama showroom as to which products are of most interest. In many cases we offer products not available anywhere in Pakistan. The designs we offer are created to outlast trends and are tried and true tested for quality and style. By importing directly, we offer to our clients the best possible value, selection, and availability.

Our goal is to make all our products featured in our brochure and website accessible. If the products are not in our warehouse, they are normally on order or in transit to avoid the normal long lead times of imported branded furniture.

Our extensive collection of residential and commercial lines offers a wide range of high design modern furnishings. Our experience with our clients and suppliers and our focus on in stock furniture make Style & Comfort, your best source for style, modern, branded furniture.

ARCHI TIMES & ARCHITECTURE + INTERIORS(A+I)

ARCHI TIMES & ARCHITECTURE + INTERIORS(A+I) are the only architectural publications publish from Pakistan and the only source of professional knowledge and information.

ARCHI TIMES is the monthly publication, which covers the current news, events and latest happenings in the field.

ARCHI TIMES also promotes the Architects by publishing their interviews and work every month. Architects who have been working for last sixty years got a chance first time to express themselves and show their work through ARCHI TIMES.

ARCHI TIMES is widely circulated amongst architects, town planners, engineers, builders, developers, contractors, interior designers, and other senior management's in building civil engineering, universities, libraries etc.

ARCHITECTURE + INTERIORS (A+I) is the only architectural magazine, which mainly covers the architectural projects and the only source to document the work of Pakistani architects in 60 years of Pakistan's history.

Prime objective of A+I is to document the valuable work of architects and quality projects. It provided the Architects of Pakistan a chance first time in the history to share their work with other professionals, young architects and students.

A+I focuses on architecture, design and interiors. The magazine is distributed to architects, engineers, building industry professionals, academics and VIPs.

What's more, A+I is an eagerly snapped up by the public from leading bookshops.

Readership: 10,000

Target Circle: Energy Sector & allied industries, trade & business, engineering sector, HVACR Industry, environment consultants & organizations, alternate energy organizations and other relevant organizations.

The Financial Daily - Corporate Profile

What is TFD?

- We are the first daily newspaper with a business and financial focus.
- We provide research based analytical views on the local and global financial markets.
- The publication of The Financial Daily started from 20th February 2007 from Karachi.
- Our circulation has touched 17,000 copies (daily) and is increasing by the day.
- Our dedicated Research Department, comprises of prominent CFAs/CAs/MBAs from major local and international institutions.

Our Vision

We strive to establish Pakistan's evolving image as an investors' haven.

Our Philosophy

- We believe that in order to make well informed and calculated decisions, investors must have access to extensively researched and clearly consolidated analytical information.
- Investors should also be made aware of prevailing trends in economic and financial performance of various sectors of the industry, instead of being excessively exposed to negativities speculated in the existing political front.

- We hold an independent and neutral stance and want to represent Pakistan's true picture as an emerging investment market to the world.
- Our well-rooted research department, processes data from various facets of the economy and churns out concrete technical analysis and research reports for our readers.
- Thus we live our dream every day.

Communication & Technology

- We use Pentium Dual Core Workstations for data analysis & all systems are networked through state of the art technology using gigabit Ethernet.
- UPS and self generation systems for Uninterrupted Power Supplies.
- E1 (2Mbps) Full Circuit on Fiber Optic Internet with 100% back-up on Satellite
- Secured FTP sites for data interchange
- Phone, Fax & Email at all locations
