Build Asia Secretariat

8, Kokan Society, Dr. Azhar Hussain Road, Near Kokan Park, off: Shaheed-e-Millat Road, Karachi-74000, Pakistan
Ph: (92-21) 111-222-444, 3870 9970 Fax: (92-21) 3486 0830
If Pakistan is to play its proper role in the world to which its size, manpower and resources entitle it; it must develop industrial potential side by side with its agriculture and give its economy and industrial basis. By industrializing our State, we shall decrease our dependence on the outside world for necessities of life; we will give more employment to our people and will also increase the resources of the state.

On the occasion of laying the foundation-stone of the building of the Valika Textile Mills Ltd. on 26th September, 1947 www.quaid.gov.pk/speech08.htm
I feel honored to know that Build Asia International Trade Fair is being organized for the 13th consecutive in Karachi. Build Asia is participated by manufacturer of construction material & machineries from all over the world and provides an opportunity to the building construction industrialists and entrepreneurs to see the state of the art machineries on display. Build Asia is highly playing an important role to boost investment in this sector and making our housing & building construction industry better equipped to compete in the world market.

The Government of Sindh is playing its due role in boosting the local and foreign business to make investments in the ambitious project of CPEC (China Pakistan Economic Corridor) in the province. The Sindh Government has taken a number of initiatives in One Belt One Road (OBOR) with Chinese cooperation in various areas of economy infrastructure in the construction development. The province of Sindh offers numerous opportunities for investment in all sectors of economy. The security situation in the province, including Karachi, has improved significantly as a result of constructive actions taken by the present Government; which is marked from the rising foreign investment. The Government has also introduced a number of modifications in trade, political and social sectors to increase the investor's assurance. Besides, a number of developments are underway to progress the infrastructure of the province to facilitate business and trade.

I congratulate Ecommerce Gateway Pakistan for putting up this mega trade fair and ensure full support from the Government of Sindh and wish 13th Build Asia International Exhibition 2017 marvelous success.
Messages

Honorable Muhammad Pervaiz Malik
Federal Minister for Commerce

The Construction sector is the backbone of our economy and holds great importance as it significantly contributes to our exports and foreign exchange earnings. The present Government has highlighted growth of different sectors of Pakistani economy and Chinese investment in CPEC projects have boosted pace of economic development.

I believe that Build Asia would be an amazing display both for public-private partnership in which each part uses its strength to bring together generous success for Pakistan that would otherwise not have been possible and produces the true potential for investment in Pakistan and portrays an image that Pakistan is as good a place to do business as any other potential country.

In last, I would like to again congratulate Ecommerce Gateway Pakistan and to all those who have worked together to put up this great show and wish 13th Build Asia 2017 have a great success a head.
Dr. Khursheed Nizam  
President  
Ecommerce Gateway Pakistan (Pvt) Ltd.

Ecommerce Gateway Pakistan proudly announces the thirteen edition of Build Asia, International Building & Construction Exhibition incorporating Stonefair Asia, Wood & Furniture Asia, Lighting Asia, Interior Decoration Asia, Paints & Coating Asia and Hardware & Tools Asia. Our team shall continue to contribute towards the growth and development of trade and industry in all the leading sectors of Pakistan, thus strengthening an economic condition of the country. It is worth mentioning that B2B events that are organized by Ecommerce Gateway Pakistan are of such repute & caliber that play a pivotal role in projecting Pakistan as a moderate and progressive country, globally.

The objective of 13th Build Asia 2017 is to develop the domestic construction industry by introducing world class products, services and state of the art technology. Participants at this exhibition will be able to view all aspects in construction and infrastructure development, including even the smallest component to the heavy machinery and equipment and gain substantial knowledge and awareness.

13th Build Asia 2017 will bring together leading Builders & Developers, Architects, Engineers, Contractors, Consultants, Interior Designers and among many others. This year’s exhibition will feature over 250 local and International brands. It will function as a vibrant networking platform and resource center for all construction industry related players in the South Asia.

Thanks to CPEC (China Pakistan Economic Corridor) initiated the project ONE BELT, ONE ROAD (OBOR) the objective of this project is to build trade routes between China and the countries in Central Asia, Europe and Indo-Pacific countries, which is on its way to make Pakistan through CPEC a richer and stronger entity, the corridor has boosted the confidence of Chinese investors. Under CPEC, Construction and Building Construction Industry of Pakistan through regional connectivity and economic integration will continue to grow and prosper.

I would also like to take the opportunity to deeply appreciate the support of Ministry of Housing & Works, Board of Investment (BOI), Trade Development Authority of Pakistan (TDAP), Government of Sindh, Karachi Chamber of Commerce & Industry (KCCI), Constructors Association of Pakistan (CAP), All Karachi Marble Industry Association (AKMIA), All Pakistan Furniture Exporters Association (APFEA), Pakistan Stone Development Company (PASDEC), All Pakistan Marble Industries Association (APMIA) and all others for their contribution in organizing the 13th Build Asia 2017.

I hereby take immense pleasure to welcome all the Foreign and Local Delegates, Investors, Entrepreneurs, Exhibitors and Visitors to the Event and assure you of full cooperation and support from the organizers.

Exhibitors’ Profile
With more than twenty five years of experience, the Abbas Steel Group (ASG) of companies is arguably the leader of steel industry in Pakistan with the logo “structuring tomorrow”. ASG is contributing to CPEC projects with quality and commitments and our mission is “To be the benchmark for excellence in the steel industry”.

The ASG has an exceptional mix of quality resource assets which with its manufacturing units produces an annual amount of approximately 300,000 Mt of steel. A combination of both automated and manual rerolling mills allows versatility in operations, increased production capacity, and product consistency; all paramount to the success of steel industry.

ASG comprises manufacturing units;
1. ASG Metals Limited
2. Abbas Engineering Industries Limited
3. Abbas Steel Industries (Pvt.) Limited
4. Al-Abbas Steels (Pvt.) Limited

Our strength lies in our peoples, technology and quality of products. This coupled with our competitive marketing and industry knowledge has allowed us to grow exponentially in the market.

At ASG we strive to maintain the level of excellence that stakeholders have come to expect from us through heavy investment in research and development as well as state of the art machinery and technology.

ASG is committed to building strong long-term relationship with customers through timely product manufacturing, prompt delivery system and effective engineering support whenever needed. We believe that meeting the highest customer satisfaction level is important for corporate success and this is essential for good business relationship.

Adamjee Dura Built (Private) Limited is Pakistan’s recognized leader in uPVC extrusion engineering profiles. We are the market front-runner due to our winning edge in quality control, product range and prompt, efficient service. This synergy allows us to understand our customers’ needs, respond quickly to market trends and provide recognized international standards for our clients.

For over 31 years, we have produced quality electrical trunking, uPVC pipe, flexible pipe & fittings and uPVC electrical conduits. Our wide range of essential uPVC building and office products have been incorporated, used and appreciated throughout Pakistan, from the National Assembly, Aga Khan Hospital, CITI Bank and Siemens Pakistan, to small offices and homes. It is clear that our products are the first choice across the spectrum of wiring solutions.

Based on our highly competent human resources systems and rigorous quality controls, our line of products (Adamjee DuraDuct, Adamjee DuraSlot, Adamjee DuraPipe and Adamjee DuraFlex) are the market benchmark for quality. We have an extremely driven team of experienced management executives, enterprising engineers, committed customer service officers, skilled technicians and a well-trained logistics crew. All these factors combine to secure our position as provides the best products in the market.

Adamjee Durabuilt (Private) Limited is Pakistan’s market leader in extrusion of uPVC, PE and PPRC profiles for electrical and water systems. Being the pioneer in ducting in Pakistan over 25 years ago with the introduction of DuraDuct, Adamjee Durabuilt continues to introduce and innovate new products for our changing markets and customer needs.

H.C.E. is an Italian leader in the production of truck cranes, at worldwide level among the companies operating in this specific sector. H.C.E. began its activity in 1980 in Castelnovo di Sotto (Reggio Emilia - Italy); since 2000 the registered trademark holder is located in the new factory at Poviglio (Reggio Emilia).

As an emerging company, H.C.E. specialized the production of hydraulic cranes. Soon after, owing to its entrepreneurial capacity, H.C.E. has been able to establish a truly qualified group, unique in Italy as to articulation, productive strength and technological innovation.

Presently the H.C.E. group includes seven companies, suitably interfaced but still preserving their own operational independence.

The respect of the environment and the personnel safety is one major concern of H.C.E.; to this purpose impressive investments have been made in equipment that aim at damping the polluting agents and reducing risks.

H.C.E. has always accepted the market challenges and counted on innovation and quality, by giving space to new forces and young ideas inside the company.

Apex Machinery is authorized dealer in Pakistan.

ARCHI TIMES & ARCHITECTURE+INTERIORS (A+I) are the only premier architectural publications publish from Pakistan and the only source of professional knowledge and information.

ARCHI TIMES is the monthly publication, which covers the current news, events and latest happenings in the field and also promotes the Architects by publishing their interviews and work every month. Architects who have been working for last sixty years got a chance first time to express themselves and show their work.

ARCHI TIMES is widely circulated amongst architects, town planners, engineers, builders, developers, contractors, interior designers, and other senior management’s in building civil engineering, universities, libraries etc.

ARCHITECTURE + INTERIORS (A+I) is the only architectural magazine, which mainly covers the architectural projects and the only source to document the work of Pakistani architects in 60 years of Pakistan’s history. Prime objective of A+I is to document the valuable work of architects and quality projects. It provided the Architects of Pakistan a chance first time in the history to share their work with other professionals, young architects and students.

A+I focuses on architecture, design and interiors. The magazine is distributed to architects, engineers, building industry professionals, academics and VIPs. What’s more, A+I is an eagerly snapped up by the public from leading bookshops.

Chongqing ShanYan Crane Machinery CO., LTD was established in 1991 as a privately owned Chinese company and has developed into a highly respected specialist company with a strong reputation as innovators, manufacturers and distributors of hoisting machinery.

Our company employs approximately 220 staffs. The manufacturing floor covers 14500 square meters with an administrative block of 900 square meters, located at B Area, Jiulongpo Industry Park, Jiulongpo District, Chongqing, China.

Our products are JCYC brand electric wire rope hoists, electric chain hoists, manual chain hoists, manual lever hoists, bridge cranes, gantry cranes, jib cranes, riggings&webbing slings, hand pallet trucks, manual stackers, crane scales, magnetic lifter. Shanyan Crane continues to show steady growth both with its representation of overseas principles and in design and manufacturing of own products.

Our company has built the reputation for 20 years, acquired the SGS ISO 9001, CE and many other domestic crane and hoist certifications. These assured the continuing success of ShanYan crane to exceed the world standard as well as the pioneer in lifting equipments in the future.

We followed a policy aimed at excellent in engineering and continuing involvement with the advances in technology, Make our customer can be assured of Safety, Quality, and Efficiency!
At COOLMAX Building Technologies, excellence is innate, and pioneering, a way of life. COOLMAX Building Technologies is engaged in the Design, Manufacture, Supply and Installation of Pre-engineered Steel Buildings & Building components for Industries, Warehouses, Commercial Centres, Multi-Storied Buildings, Aircraft Hangars and Stadia etc. Covering a wide spectrum of application areas, COOLMAX has brought Innovation, Design Distinction, International Expertise and above all, Global quality to every customer who aspires for Technological and Structural superiority.

The Pre-engineered Steel Building System in itself offers great advantages to the customer as a more feasible, practical and efficient alternative to conventional buildings. Some of the distinct advantages include:

- Durability Weather resistant, earthquake resistant
- Value Low initial investment, low maintenance cost
- Flexibility Easy to expand, easy to setup and change
- Faster Reduced construction time
- Aesthetics Gives the engineer enough flexibility to create unique structures

Product Line : Upvc profile for window and door

Founded in 1992, Shide now becomes a large-scale enterprise oriented with chemical building materials over 25 years’ rapid development. Headquartered in Dalian and ready to face the world, Shide has been one of the largest chemical building material manufacturers in the world and our annual capacity is 0.7 million tons.

With the importation of advanced equipment abroad, the research and development of unique formula with processing craft, and the enchanting of QC system, Shide upvc products has been in peer with top competitors globally. Nowadays, Shide owns the most completed CMB research institute in China- “Dalian Shide Chemical Building Materials Research Institute ”, and the only “Post-doctor R & D Workstation”.

During the expansion in decades, Shide has scored the firsts in achieving certification of ISO 9001, 9002, 14000 standard systems, and certificate of German DIN, Japanese JIS. European Federation of Plastic Window Manufacturers (EPW) and American Architectural Manufacturers Association (AAMA) have both conferred membership to Shide as well.

ENGRO POLYMER & CHEMICALS LIMITED (EPCL)
12th Floor, Ocean Towers, Khayaban-e-Iqbal
Karachi
Tel : 92-21-111-411-411
Web : www.engropolymer.com
Facebook page : www.facebook.com/EPCLCONNECT
Stall No(s) :

Engro Polymer & Chemicals Limited (EPCL) is the only fully integrated Chlor-Vinyl chemical complex in Pakistan. It is a subsidiary of Engro Corporation, involved in the manufacturing, marketing and distribution of quality Chlor-Vinyl allied products and Poly Vinyl Chloride (PVC).

PVC suspension resin is the primary product of Engro Polymer & Chemicals Ltd. Produced in a wide range of K-values: AU 58, AU 60, AU 72, AU 67R and AU 67S, it is used in the manufacturing of varied PVC based products. The different grades of resin offer a diverse range of properties that can be used in all the processing methods. PVC is the oldest and the most versatile of all polymers, is resistant to corrosion, weathering, impact and scratches, and acts as a superb electrical insulator. Cheaper than other plastics, it offers value at affordable cost, and is therefore one of the most widely used plastic materials in the world.

In the domestic market of PVC, resin is mainly used to manufacture PVC pipes. Approximately 55% of the resin consumption is in this sector alone. Other sectors include artificial leather, shoes, rigid and soft sheets, garden hose, windows and doors etc.

EPCL is actively involved in ensuring the sustainability of the domestic PVC industry, along with providing support through provision of quality products and technical services. New markets are continuously being tapped by its Business Development team for its product applications. All practices within the domain of the Company are ensured to comply with its Core Values of ethics, health, safety and environment on a constant basis.

EPCL strongly endorses its triple bottom line philosophy in true essence – People, Planet and Profit are critical and indispensable elements for its growth and success.
Engro Polymer & Chemicals Limited (EPCL) is the only fully integrated Chlor-Vinyl chemical complex in Pakistan. It is a subsidiary of Engro Corporation, involved in the manufacturing, marketing and distribution of PVC and Chloralkali products.

Product Line : IBEX Indus Red Granite, Blocks, Slabs and Tiles

Pakistan is endowed with extensive natural resources including, base metals, industrial minerals, gemstones and dimensional stones etc. Frontier Works Organization (FWO) established Mineral Exploration and Development Organization (MEDO) in December 2015, which not only introduce legal mechanical mining in mineral sector in national interest but also act as an engine for the development and exploitation of huge mineral potential of the country. FWO has already initiated two pilot projects of Copper Mining & Processing in North Waziristan Agency (FATA) and Granite Mining Project at Nagarparkar, Sindh. Both projects have successfully conducted their Pilot Phases and entered into the Operational Phase. MEDO also envisions supporting large scale mineral development infrastructure in Pakistan, under the umbrella of FWO.

Stall No(s) :

GM Cables & Pipes (Pvt) Ltd. Starting from modest organization 40 years ago, GM has come a long way in establishing itself as a leading manufacturer of cable, U-Pvc pipe & ducts industry. Since inception, GM has been setting standards in quality & safety with all its products. GM Cables & Pipes (Pvt) Ltd. plant located at Ferozpur Road, Lahore, is equipped with the most sophisticated manufacturing and testing equipments. Quality is the hallmark of GM products, which has been sustained throughout the period. Started by late Mr. M. Jahangir Chauhdary as a small scale house wiring industry, today GM Cables & Pipes (Pvt.) Ltd. stands outs as one of the most reliable and recognized manufacturer of Cables, Pipes and Ducts in Pakistan.

Lead by visionary leadership, the organization realized that the growing population and power needs in Pakistan would demand more power consumption and generation. Power Cables being exponentially related to power generation, GM has been continuously enhancing its product ranges, while maintaining its traditional quality. In 1990 we GM started manufacturing power cables for power and industrial infrastructure. In 2000 a new product PVC Granular was started to become self-sufficient in indigenous demand and to serve the others cable industry. In 2009 we GM added U-PVC Pipes & Accessories for electric cables, offering total solution to house electrification. In 2011 it started sewerage and pressure pipes to complete its pipes range. A further addition of PPRC pipes is on the way to offer safe and reliable potable water distribution system to households of Pakistan. The Growth of our company shows the trust and confidence of customers on GM products.

GM Cables was established on the philosophy of delivering products to the customers Just in Time (JIT) and accordingly established a vast network of dealers, the largest in its category, scattered throughout Pakistan, which still is successfully operational. Details of GM dealers are available on its website www.gmcables.com. However, to cater industrial and infrastructural projects more closely, it has also developed an efficient and genial sales team which remains available to service its valued customers. GM Cables & Pipes (Pvt.) Limited is committed and geared-up to match the customer satisfaction by manufacturing and supplying cables & pipes/ducts conforming to national and international standards. Continuous improvements through R&D cell and technological excellence with vigorous trainings of employees are the features to meet its stringent quality policy.

Greaves Pakistan (Pvt) Ltd was established in 1859 by two Englishmen to provide specialized engineering equipment sales & services.

For the past 60 years, Greaves Pakistan has pioneered in providing solutions for the following segments:

**Diesel, Gas Power Solutions & Engines**

![Kohler SDMO](image1)

We are the authorized distributor of Kohler SDMO (France) power products (8KVA-4200KVA) in Pakistan & provide customized turnkey solutions, including rental solutions. We also provide Europower™ high quality portable generators (petrol) which powers necessary domestic appliances whilst Multi-Fuel generators having electronic engine (NG/LPG/petrol) powers multiple air-conditioning equipment. We also provide sales, service and spare parts for Deutz Engines (Germany).

**Renewable Energy and LED Lighting Solutions**

![Greaves Solar](image2)

Representing leading module technology, Greaves Solar guarantees world class stability and reliability, backed by performance warranty. Greaves represents the leading manufacturers of solar panels, inverters and batteries. Greaves also offers LED Lighting Solutions, which gives energy efficiency of up to 65%; LED’s long life and sharp color make them an excellent choice for commercial and residential use.
GREAVES PAKISTAN (PVT) LTD.

Elevators & Escalators

We represent the French manufacturer, Sodimas, a leading player in the lifts sector. Greaves provides the most reliable and innovative people movement solutions. We have factory trained engineers who carryout installations and are also equipped with latest tools and software providing efficient after sales support.

Earth Moving and Material Handling Equipment

While representing the leading Chinese Manufacturer, XCMG, Greaves has state-of-the-art earth moving machinery and material handling equipment under its umbrella. We also represent Atlas Copco construction tools and Dynapac Road Rollers Compactors & Pavers. Greaves also provides earth moving machinery of the leading European brand JCB.

Pumps & Pumping Systems

Greaves is the authorized distributor of Wilo Pumps. Wilo is one of the world's leading German manufacturers of pumps and pumping systems in the fields of building services, water management and industry. Wilo offers energy-efficient solutions for heating technology, air-conditioning, water supply and wastewater disposal.

Rental Equipment Services

Greaves has one of the largest fleet of diesel generating sets. We have a fleet of more than 250 units of diesel generators ranging from 20KVA – 1500KVA. Our rental fleet also comprises of earth moving machinery which includes cranes, road rollers, loaders, forklifts, and lighting towers. The Rental Division has dedicated service vans providing prompt and efficient service & support, round the clock.

HNGM is a family owned company. We are well experienced in undertaking Granite quarrying operations. We are committed in providing the finest quality stone and we adhere to global standards with our stringent norms and practices.

Presently HNGM is quarrying one of the exotic kind of Granite which is very rare and astonishingly beautiful Khyber Cianitus.

The Beauty created in Million Centuries:
Khyber Cianitus is Schist Granite, which is quarried in Buner Pakistan by HNGM. In business world it's sister material, is only mined from Brazil, is called with different names i.e. Cianitus, Metallica and Asterix, with few shades and colour changes as it would varies from quarry to quarry. Positive thing that makes Golden Khyber stronger in the family is the smaller grain size as compared to others.

This Schist granite in general is not only strikingly beautiful, it’s versatile in look, heat resistant ,water resistant and incredibly strong. Schist Granite is made up of interlocking mineral crystals, the most common being Aluminium, Feldspar and Quartz.

This granite is a natural stone with base that comprises a wavy pattern of silvery greenish blue and brown shades defined by characteristic tones throughout its surface, offering a unique look to any space in which it is displayed.

Khyber Cianitus is quarried with latest technology available in the field such as Diamond Wire Saws and DTH Drills. We do not use explosives in our quarries.

This material is available in standard polished Mirror finish. Special finishes such as Leather/Antique , Flamed and Natural Split Face are supplied to order.

Uses:
This material is mainly used for pavement,skirting, countertops, sinks, monuments, pool cover, window sills, ornamental stone, interior floor, interior wall, background wall tile, wall cladding, steps, liners, borders, mosaics, columns, exterior and other designs projects.

Iran’s Tile and Ceramic Producers’ Guild was founded on November 17, 1996 by a number of the industry’s stakeholders. Due to further investment in the tile and ceramic industry, the Guild deemed it necessary to enhance its consistency by introducing measures to coordinate activities between the government and industry owned establishments in the form of strategic management of tile and ceramic industry. Upon fruition of the investments made by newly founded units, the ongoing interaction of the Guild with these units, and establishing closer ties with the decision making centers in the government as well as the relevant organizations for solving guild-related problems, more and more companies were willing to become Guild members. so that now, with more than 100 large companies as its members, the Guild is in a position to act as a specialized policy maker in the tile and ceramic industry and play an effective role in decision makings related to production, control, and market management.

MARNITE MARBLE

INTRODUCTION LETTER
We are pleased to introduce ourselves as an aggressive organization with the name of Marnite Industries, specializes in building material for the residential / commercial high rise buildings and industrial sector across Pakistan, offering innovations, quality, prices competitiveness & services.

Please take a moment to look at our high quality MARNITE product lines:

1. Granite
2. Marble
3. Sandstones
4. ONYX

Marnite Industries dedicated to meet your needs for quality materials at a competitive price. We offer high quality products, architectural and specification assistance, professional and courteous delivery and much more. We specialize to cater needs of the evolving “construction stone” market in Pakistan.

MISSION:
Our mission is to provide superior services to our valued clients, while supplying quality materials at competitive prices. We believe that we can save our client’s time and cost by our committed services.

QUALITY & SERVICES POLICY:
Marnite Industries is committed to provide innovative quality products and services to achieve Customers' total satisfaction. This is achieved by understanding their existing requirements and anticipating their future expectations or needs. We will strive to fulfill statutory and applicable regulatory requirements related to our products. We pledge to satisfy our customers by providing excellent products through motivated, qualified, dynamic & customer oriented team. To achieve this objective the company will continue updating employees’ abilities, knowledge and create opportunities for their training and awareness to enhance their competence level. We promise to establish mutually beneficial relationship with client in order to facilitate our consistent supplies to maintain the quality of our products. The company shall share new technologies with associated overseas companies in its desire for continual improvement of its products and processes. All the time we believe to provide best services to our customers and quality material at competitive prices.
MARNITE MARBLE

COMMITMENT TO OUR CUSTOMERS:
The secrets to our success are cost effective products and services to cater to the competitive needs of our customers. Our aim is to fulfill the requirements of our valued customers by building a strong customer relationship based on personalized service with sensitivity to each of our customer's needs. We provide value and quality coupled with service to provide the solution. Our sales and technical staff are engaged in a continuous effort to offer their expertise to the customers to establish business partnerships with our customers. You can consult our sales staff for detailed information regarding all our products. Therefore we are able to maintain our high standards of quality and service. Join hands with us to increase your profits through our services with best competitive prices. Marnite Industries is ready along with our valuable customers, to meet the challenges in the country and to compete with imported products. This is only possible with mutual cooperation.

Marnite Industries is ready to provide their best services based on our mission of dedicated services to our valued clients with supplying quality materials at a competitive price. We strongly believe that we can build a strong business relationship and can save our client’s time and cost by our committed services.

You are requested to please give us opportunity to start working with your esteemed organization and assure you to our best services at all times.

Foreign Principals
Pakistan Insulations Pvt Ltd was established in 1986 as a manufacturing company dedicated to improving the thermal efficiency in the country. Our mission was and has been throughout to promote the energy conservancy in the period of history witnessing ever rising energy cost and mitigate environment damage due to use of fossil fuel to generate it.

Pakistan Insulations Pvt Ltd is presently manufacturing the following products in line of its core value.

1. **Rockwool.**
   Rockwool is manufactured in Blanket, Pipe Cover and Board form. This product is ideally suited to provide thermal insulation in industrial as well as residential sector. Its unrivalled thermal insulation properties are complemented by its fire proofing properties.

2. **Polyurethane Sandwich Panels.**
   Polyurethane Sandwich panels are used in the fabrication of Cold rooms. Its structural properties are useful for fabricating Porta Cabins and lining temperature controlled Pre Engineered Steel Building.

3. **Light Gauge Steel Construction.**
   Pakistan Insulations Pvt Ltd has acquired a state of the art roll former from Framecad New Zealand. Framecad is the world leader in CNC roll formers. The Light Gauge steel buildings produced are renowned for their thermal efficiency, fire proof nature and quick deployment.

4. **Pre Engineered Steel Building.**
   Pre Engineered Steel buildings are ideally suited for industrial units, ware houses large public places. These buildings are especially noted for providing open span construction, quick deployment and cost effectiveness.

Pakistan Profiles Company is a prominent fabricator of high quality UPVC windows and doors. Professionally managed with more than 15 years of experience, the company specializes in the designing, manufacturing, installation and services of UPVC fabricated products that include windows, doors, office cabins, shower cabins, and partitioning walls. Having established a state-of-the-art window fabrication plant, our modern and versatile unit has the capability to handle large projects for end customers along with maintaining a sizeable stock of profiles and accessories for our dealers. As a result of the company’s architectural firms have repetitively associated with our team of professionals for their major projects in order to make an astounding visual impact.

We try to excel at whatever we do. Product and service excellence are our all-time aims. We like to dream. Dreams are always welcome. Because if you really work at them with all that you have, dreams do come true! We treat our customers, suppliers, employees, and other stakeholders as partners. We believe, all of us can achieve our highest potential working together not alone.

OUR MISSION:
To perform for our customers the highest level of quality and competitive prices. To ensure the longevity of our company through repeat and referral business achieved by total customer satisfaction with all aspects of our team and its services.
To demand the highest levels of professionalism, integrity, honesty and fairness in our supplier, subcontractor, vendor, employee and industry services relationships. To provide a safe workplace for our employees and contract employees with proactive safety and loss-prevention training and zero tolerance for omissions or negligence.

Why Pakistan Profiles Company?
Pakistan Profiles’ UPVC windows offer a number of benefits over conventional wood, aluminum and steel windows. Some of these benefits, that greatly improve quality of life, are as follows:

The Pakistan Profile Windows will give you very good insulation around the frame and employs the usage of thermal breaks. It helps to keep cold out during the winter and conversely keeps the property cooler in the hotter months of the year, more important if you are living in...
an area which is affected by such extremes. An obvious advantage to this, apart from your personal comfort, is the savings you can make on your heating and cooling bills by having forte-stated and glazing fitted.

The excellent seals and insulation present means that dust particles and pollen are kept to a minimum in a building. At high pollen times, hay fever sufferers will be thankful for the extra protection that they receive from this reduction of external allergens entering the home or office.

During the life span of these windows, very little maintenance is required. Of course they will look better with the odd wipe or wash to the window frames, but there should be no painting or weatherproofing required.

The windows have a very secure multi-point locking system, which gives a building more security than traditional types of window clasps such as old style, sash window locks for example. It is also very difficult to break through a UPVC frame. If you are going to undertake security measures such as installing security cameras, or even fake security cameras and a house alarm, having double glazing and good quality multi-point locks on your windows certainly also helps.

Cost is always a factor when installing such features as windows, doors, guttering, etc. Pakistan Profiles are well up there in the cost effectiveness stakes and this means that for a lot of people, cheap UPVC windows will be given serious consideration.

Unlike ordinary, conventional systems, Profiles’ UPVC windows are welded to ensure that there is no air gap. This high-quality precision binding keeps the house free from dust and noise.

Profiles’ windows are made from UPVC materials, which are bad conductors of heat, thus keeping the house cool and reducing consumption of electricity UPVC material used in Profiles windows and doors illuminates the hazards of fire and ensures safety for you and your family.

The antistatic nature of UPVC repels dust and other harmful dust particles from the panel

Saves Energy – These windows cuts air conditioning costs significantly.

Ventilation: Ease of use allows ample ventilation and sunlight in the house.

Maintenance free and long lasting – These windows do not require paint or polishing and are therefore maintenance free

Windows to withstand high wind speeds by imparting additional strength.

More Sunlight, brighter rooms: Strength of windows allows Pakistan Profiles to make windows that are large in size, allowing more sunlight.

Noise and Dust Proof: Silicon sealing, multi-point locks and non-conducting properties of UPVC make these windows noises and dust proof.
PAKISTAN STONE DEVELOPMENT COMPANY (PASDEC)

2nd Floor Islamabad Chamber of Commerce Building
Mauve Area G-8/1 Islamabad
Tel : 92-51-9263465

Pakistan Stone Development Company (PASDEC)

PASDEC was established in 2006 under section 42 of company’s ordinance 1984 as a subsidiary of Pakistan Industrial Development Corporation (PIDC), working under the auspices of the Ministry of Industries and Production for the development of Marble and Granite Sector of Pakistan.

Functions of PASDEC:
The Company’s core function is to develop the dimensional stone industry of Pakistan, which is being carried out by introduction of latest mechanized machinery (Machinery Pools), development of quarries, establishment of state of the art Marble Cities/Industrial Estate and Common Facility & Training Centers/ Warehouses along with the skill development to overcome the skilled workforce deficit of the industry.

Core Objectives:
The core objectives of the company are as follow:
• To promote, develop and up-gradate dimensional stone sector
• Enhance technical capabilities of the stone sector
• Demonstration of latest quarrying and processing techniques
• Establish model quarries and training institutes
• Extraction of dimensional stone square blocks
• Establishment of Common facility center, Warehouses and Marble cities in potential marble and granite clusters.

Overall Performance:
PASDEC has achieved the target of introduction of latest quarrying techniques, technology and skill development in the sector. The wastage at the mechanized quarries developed by PASDEC has been considerably reduced. Due to the demonstration effect created by PASDEC, the mine owners are shifting towards mechanized quarrying in the country. The Company has also established 15 mechanized quarries, 2 Machinery Pools and 1 Marble City. Besides this, the Company has trained more than 605 operators on mechanized mining, 1,262 females on mosaic, inlay and handicraft to cater for skill development need of sector in collaboration with the donor agencies.

Product Line : Crete Plant, Crete Plant Palletes, Ready Mix Plant, Brick Plant, Engineering Solution

SABZ TRADERS was founded with a mission to meet the challenges of the Industrial problems. We have strong engineering background in the field of Electrical, Electronics, Mechanical and Industrial Automation.

CONSTRUCTION MACHINERY
We provide complete solution for the construction machinery consultancy and feasibility for , Ready mix plant, Crete Plant ranging from small size to fully automatic plants from china best manufacturs. Brick plant complete design and execution project. Concrete Pump and their spare parts. Beside this we provide the spare parts for all sort of machineries..

AUTOMATION SOLUTION
Most of the Industries are worried about their obsolete hardware Now we offer a competitive solution to upgrade the control system of their machine or even entire plant. Upgrading of your obsolete system with market available hardware. Trouble shooting of the system.System software backup and support. Hands on Experience on the PLCs Like Siemens, OMRON, MITSUBISHI, FATEK, Delta & LG

ENERGY AUDITS
We provide energy audits and based on this the amount which is being drained can be saved. Now a days making utility cost economical is every industry need. We provide complete utility audit giving design to operational improvements. We audit for Electrical, Steam, Compressed Air and natural gas utility.

ELECTRICAL SWITCHGEAR AND PANELS
We can design and manufacture the Switchgear Panels Like
- LT Panels
- MCC Panels
- Power Factor Improvement Panels
- VFD Panels
- PLC Based Touch Panel Desk or any control Panels.

We also manufacture the Cable Trays, Cable Ladders in Powder Paint, Epoxy paint or any custom paint required

SANY Group is a global company in the construction machinery industry with a range of concrete machinery, excavator, hoisting machinery, pile driving machinery, road construction machinery, port machinery, and wind turbine. SANY began in 1989 as a small welding material factory. Now it has grown into a global corporation with five industrial parks in China and four R&D and manufacturing bases in America, Germany, India and Brazil. SANY became the unique company listed among the world’s top 500 companies in China’s construction machinery industry. Each year, SANY Group re-invests 5-7% of its sales revenue into the R&D, making it possible to expand its product lines to concrete, road, port, hoisting, pile driving, excavating machineries and wind energy products. Now as one of the most successful enterprises in China, SANY becomes one of the global top construction manufacturers. SANY has shown that there is no limit for SANY in concrete pumping technology. With its unique advantages, SANY is striving to help build a better world.

SURFACES is a collaboration of suppliers of leading building material stores in the market. Together we continuously work in developing the visual trends of tomorrow. Introducing the market with the latest products, unheard of locally!

The Company's Philosophy:
"Sustainable and innovative building materials for a better future"
Sitara Factory was established in 1952, in this time span our company has made significant progress. We have accumulated rich experience in manufacturing Building Hardware Materials. Our brand names spell for quality, artistry and technological excellence. We now look forward to greater heights in the days to come, because customer satisfaction is our ultimate goal.

Slowly but steadily we are becoming a prominent player in this industry. All credit for our success goes to untiring efforts of our skilled workforce and excellent leadership provided by our management. Sitara Factory aims at developing strong and long lasting relationships with its customers.

Our products are manufactured in a plant equipped with modern machinery using advanced technology. We have all production processes in house and every stage of manufacturing is kept under strict control. The invisible factor that adds value to every company's product is the quality of its services. Sitara Factory recognizes the importance of this aspect of supplier performance and is committed to continual improvement.

We offer an attractive range of exquisite items made of Brass, Black Iron Fittings, Aluminum Door Fittings etc. which are best in quality, finish and durability. We also develop premium quality door hardware such as door furniture, window fittings and cabinet fittings.

We promote quality while maintaining the cost very low for the end user. Our stringent quality control methods help us producing the flawless products. Every product is checked at every stage right from casting to packing. Every individual manufacturing process is given a cross quality check to ensure maximum customer satisfaction.

We have a vast supply network throughout the country. We aim at delivering high-class products of premium quality at competitive prices. What we have earned in all these sixty five years is buyers' satisfaction and an invincible reputation in local industry. Our company wants to have a client base all over the world therefore it intends to make inroads into the foreign markets. To achieve this our company is actively looking out for peoples who can become our business partners in the overseas market.

Stall No(s) : 1
Product Line : PVC Flexible Pipe and Rigid Pipe
Stall No(s) :

Tarbela Industries Pvt Ltd was established in 25.06.1989. Tarbela Industries Pvt Ltd manufactures PVC Compound, PVC Hose and PVC Footwear.

Until 1989, Gadoon Amazai was a remote area where heroin was cultivated. To abolish the cultivation of heroin and to promote development in this area, the government converted it into an industrial area. It gave incentives to aspiring entrepreneurs to set up their businesses in Gadoon. These incentives included no sales tax, no income tax and no custom duties for a period of 10 years. The electricity was also low as compared to other industrial states. Furthermore, the markup was only 3%. Due to these incentives, Tarbela Industries was set up and has flourished since then.

Tarbela Industries imported their machinery from Italy and Taiwan.
The Registered Office of the company will be situated in the Province of the Punjab, Pakistan.
The objects for which the Company has been established are all or any of the following (and in construing the following sub-clauses of the scope of no one of such sub-clauses shall be deemed to limit or effect the scope of any other such sub-clauses):

To set up factories for the manufacture of Footwear Products, Rubber and PVC footwear, PVC Compounds, PVC products of all kinds, hand-bags, picker hands and other similar accessories, bed covers, made wholly or in part of leather, rubber, canvas, fiber or any substitute thereof and to import, export, buy, sell, acquire, deal in stock, carry on repairs, alter, improve all kinds of merchantable commodities made of leather, canvas, rubber, fiber or anyone or more of such kindred materials.
Quality is a trait we appreciate.

Tarbela Industries is a leading pipe manufacturer in Pakistan. We offer a wide range of pipes with several sizes and best quality manufactured on the latest Italian plant.

Product Line : Various Type Of Cement & Clinker

Zabol cement industries company was founded in 2003. Consequently, Sistan Cement factory was established with vision of production of clinker and different types of Portland and pozzolana cement by the latest machineries both in production and quality control in order to increase customer satisfaction and enhance company's value to its customers, employees and shareholders. Therefore, mission to provide highest quality and quantity of products in domestic and foreign market could be fulfilled.

Plant Construction's Cornerstone was on April 2006 65km from Zahedan-Mashhad road. On August of the same year, initial concrete work took place. 32 month later on November 2009 plant reached production. Opening ceremony was held on 29 April 2010 by the presence of current president of Islamic Republic of Iran.

This plant was constructed and entered into industrial market of the country with philosophy of decreasing deprivation of people of region by job creation, use of human, natural and mineral resources of province in order to produce and meet regional demand of cement as well as provision of pathway to export to countries located to the east and South of Iran. Based on this unique fundamental organisational thoughts, existence of high quality mines and mineral resources and the idea of use of the latest production technology goal of production at the heart of desert was set to result in economical, industrial and social improvement.
